SUPPLEMENTARY INFORMATION: On December 9, 2008, notice was published in the **Federal Register** (72 FR 74708) that a modification of Permit No. 1547-01, issued March 22, 2007 (72 FR 17135), had been requested by the above-named individual. The requested modification has been granted under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226).

In addition to all research activities authorized under Permit No. 1547-01, this modification authorizes anesthesia and gastric lavage on up to 200 shortnose sturgeon (*Acipenser brevirostrum*) in the Haverstraw and Newburgh Bays of the Hudson River. The researcher also is permitted one unintentional mortality of a shortnose sturgeon during the remaining permitted period. The goal of the additional research will be to document the diet of shortnose sturgeon occupying the same habitat as Atlantic sturgeon (*Acipenser oxyrinchus oxyrinchus*) in the lower Hudson River. This modification will be valid through the expiration date of the original permit, October 31, 2011.

Issuance of this modification, as required by the ESA, was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of such endangered or threatened species, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: March 24, 2009.
