C. How will confidential business information be protected?

A person seeking to protect from disclosure as “confidential business information” any information that person submits under TSCA must assert and substantiate a claim for protection from disclosure concurrent with submission of the information in accordance with the requirements of TSCA section 14 and 40 CFR 703, with limited exceptions provided in the statute. TSCA section 14(b) limits

confidentiality protections for health and safety studies and information from such studies, however, and while EPA considers confidential business information when conducting its review under 40 CFR 702.9(a), the Agency encourages submitters to minimize claims for protection from disclosure wherever possible to maximize transparency in EPA’s screening review. More information on asserting and submitting confidential business information claims under TSCA can be found at 40 CFR 703 and <https://www.epa.gov/tscabi>.

[Docket No. OP–1863]

Regulation Q; Regulatory Capital Rule: Risk-Based Capital Surcharges for Global Systemically Important Bank Holding Companies

AGENCY: Board of Governors of the Federal Reserve System (Board).

ACTION: Notice.

SUMMARY: The Board is providing notice of the 2024 aggregate global indicator amounts, as required under the Board’s rule regarding risk-based capital surcharges for global systemically important bank holding companies.

DATES: December 18, 2024.

For the hearing impaired and users of Telecommunications Device for the Deaf (TDD) and TTY–TRS, please call 711 from any telephone, anywhere in the United States.

SUPPLEMENTARY INFORMATION: The Board’s framework for determining risk-based capital surcharges for global systemically important bank holding companies (GSIB surcharge rule) establishes a methodology to identify global systemically important bank holding companies (GSIBs) in the United States based on indicators that are correlated with systemic importance.¹ Under the GSIB surcharge rule, a firm must calculate its GSIB score using a specific formula (method 1). Method 1 uses five equally weighted categories that are correlated with systemic importance—size, interconnectedness, cross-jurisdictional activity, substitutability, and complexity—and subdivided into twelve systemic indicators.

A firm divides its own measure of each systemic indicator by an aggregate global indicator amount. A firm’s method 1 score is the sum of its weighted systemic indicator scores expressed in basis points. A firm that calculates a method 1 score of 130 basis points or more is identified as a GSIB under the GSIB surcharge rule. The GSIB surcharge for a firm is the higher of the GSIB surcharge determined under method 1 and a second method, method 2, which is calculated based on measures of size, interconnectedness, cross-jurisdictional activity, complexity, and the firm’s reliance on short-term wholesale funding.²

The aggregate global indicator amounts used in the score calculation

¹ See 12 CFR 217.402, 217.404.

² Method 2 uses similar inputs to those used in method 1 but replaces the substitutability category with a measure of a firm’s use of short-term wholesale funding. In addition, method 2 is calibrated differently from method 1. See 12 CFR 217.405.

under method 1 are based on data collected by the Basel Committee on Banking Supervision (BCBS). The BCBS amounts are determined based on the sum of the systemic indicator amounts as reported by the 75 largest U.S. and foreign banking organizations as measured by the BCBS, and any other banking organization that the BCBS includes in its sample total for that year. The BCBS publicly releases these

amounts, denominated in euros, each year.³ Pursuant to the GSIB surcharge rule, the Board publishes the aggregate global indicator amounts each year as denominated in U.S. dollars using the euro-dollar exchange rate provided by the BCBS.⁴ Specifically, to determine the 2024 aggregate global indicator amounts, the Board uses the year-end 2023 euro-denominated indicator amounts published by the BCBS and

multiplies each of the euro-denominated indicator amounts by 1.105, the euro to U.S. dollar spot exchange rate on December 31, 2023.⁵

The aggregate global indicator amounts expressed in U.S. dollars for purposes of the 2024 method 1 score calculation under § 217.404(b)(1)(i)(B) of the GSIB surcharge rule are:
