Advisory Committee Open Session on Management Strategy Evaluation for North Atlantic Swordfish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of meeting.

SUMMARY: NMFS is holding a public meeting via webinar session for the Advisory Committee to the U.S. Section to the International Commission for the Conservation of Atlantic Tunas (ICCAT) and all interested stakeholders to receive an update and provide input on the development of the management strategy evaluation (MSE) for North Atlantic swordfish.

DATES: A virtual meeting that is open to the public will be held by webinar session on August 24, 2023, from 3 p.m. to 5 p.m. EDT.

ADDRESSES: Please register to attend the meeting at: <https://forms.gle/QbymT8n4mYm7SP3S9>. Registration will close on August 22, 2023, at 5 p.m. EDT. Instructions for accessing the webinar session will be emailed to registered participants.

FOR FURTHER INFORMATION CONTACT: Bryan Keller, Office of International Affairs, Trade, and Commerce at (301) 427–7725 or Bryan.Keller@noaa.gov.

SUPPLEMENTARY INFORMATION: MSE is a process that allows fishery managers and stakeholders (e.g., industry, scientists, and non-governmental organizations) to assess how well different strategies achieve specified management objectives for a fishery. ICCAT expects to finalize its North Atlantic swordfish MSE in 2023 and anticipates adopting a management procedure in November 2023 to set the total allowable catch for 2024 and future years for the stock. NMFS, and the U.S. Government more broadly, engages in this MSE development, an important part of which involves considering stakeholder input throughout the process through various means, including consultation with the Advisory Committee to the U.S. Section to ICCAT. The United States is also participating in the development of the North Atlantic swordfish MSE through the active involvement of U.S. scientists in the scientific work carried out by ICCAT's Standing Committee on Research and Statistics (SCRS).

The August 24 meeting is intended to update U.S. stakeholders and solicit their input on the MSE approach being developed by ICCAT for North Atlantic swordfish. NMFS will provide information on the progress of the SCRS in developing initial candidate management procedures (CMPs) and testing them based on the initial input on management objectives and other relevant matters provided by ICCAT's Panel 4. CMPs illustrate tradeoffs associated with achieving identified management objectives related to stock status, stock safety, yield, and catch stability over time. CMP testing assists

ICCAT in refining management objectives and narrowing the number of viable CMPs for possible adoption by the Commission. This open session Advisory Committee meeting is primarily informational in nature and is intended to increase the opportunity for stakeholder awareness and input on the North Atlantic swordfish MSE process. Discussions at the meeting will help inform U.S. scientists who are participating in the work of the SCRS as well as U.S. managers participating in relevant Commission-related meetings later in 2023 addressing the North Atlantic swordfish MSE.

SUPPLEMENTARY INFORMATION:

Title: Exemption from Derivatives Clearing Organization Registration (OMB Control No. 3038-0117). This is a request for approval for an existing collection in use without a currently approved OMB control number.

¹ 17 CFR 145.9.

Abstract: This information collection is associated with CFTC regulations codifying the policies and procedures that the Commission follows with respect to granting exemptions from registration as a DCO for the clearing of proprietary swaps for U.S. persons and futures commission merchants ("FCMs"). The rules include reporting requirements that are collections of information requiring approval under the PRA. Specifically, Commission regulation 39.6 specifies the conditions and procedures under which a clearing organization may apply for exemption from registration as a DCO, the information that must be provided to the Commission to obtain and maintain such exemption, and procedures for termination of an exemption. See 17 CFR 39.6. The information that is collected under these regulations is necessary for the Commission to determine whether a clearing organization qualifies for exemption from DCO registration, to evaluate the continued eligibility of the exempt DCO for exemption from registration, to review compliance by the exempt DCO with any conditions of such exemption, or to conduct its oversight of U.S. persons and the swaps that are cleared by U.S. persons through the exempt DCO.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. On May 30, 2023, the Commission published in the **Federal Register** notice of the proposed extension of this information collection and provided 60 days for public comment on the proposed extension, 88 FR 34489. The Commission received no relevant comments that addressed its PRA burden estimates.

Burden Statement: The provisions of part 39 of the CFTC's Regulations include reporting requirements that constitute information collections within the meaning of the PRA. With respect to the ongoing reporting obligations associated with exemption from DCO registration, the CFTC believes that exempt DCOs incur an aggregate annual time-burden of 257 hours.

Respondents/Affected Entities:

Derivatives Clearing Organizations.

Estimated number of respondents: 9.
Estimated average burden hours per respondent: 29 hours.²

Estimated total annual burden hours on respondents: 257 hours.

Frequency of collection: On occasion.

² Average burden hours per respondent rounded to the nearest full hour.
