In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Agency for Toxic Substances and Disease Registry (ATSDR) and the Centers for Disease Control and Prevention (CDC) announce the following meeting.

Name: Citizens Advisory Committee on Public Health Service Activities and Research at Department of Energy (DOE) Sites: Idaho National Engineering and Environmental Laboratory Health Effects Subcommittee (INEELHES).

Times and Dates: 8:30 a.m.-4:30 p.m., November 6, 2002. 8:30 a.m.-11:15 p.m., November 7, 2002.

Place: The Coeur d'Alene, 115 South 2nd Street, Coeur d'Alene, Idaho 83816, telephone (208)767-4000, fax (208)664-7276.

Status: Open to the public, limited only by the space available. The meeting room accommodates approximately 50 people.

Background: Under a Memorandum of Understanding (MOU) signed in December 1990 with DOE, and replaced by MOUs signed in 1996 and 2000, the Department of Health and Human Services (HHS) was given the responsibility and resources for conducting analytic epidemiologic investigations of residents of communities in the vicinity of DOE facilities, workers at DOE facilities, and other persons potentially exposed to radiation or to potential hazards from non-nuclear energy production use. HHS delegated program responsibility to CDC.

In addition, a memo was signed in October 1990 and renewed in November 1992, 1996, and in 2000, between ATSDR and DOE. The MOU delineates the responsibilities and procedures for ATSDR's public health activities at DOE sites required under sections 104, 105, 107, and 120 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or "Superfund"). These activities include health consultations and public health assessments at DOE sites listed on, or proposed for, the Superfund National Priorities List and at sites that are the subject of petitions from the public; and other health-related activities such as epidemiologic studies, health surveillance, exposure and disease registries, health education, substance-specific applied research, emergency response, and preparation of toxicological profiles.

Purpose: This subcommittee is charged with providing advice and recommendations to the Director, CDC, and the Administrator, ATSDR, regarding community concerns pertaining to CDC's and ATSDR's public

health activities and research at this DOE site. The purpose of this meeting is to provide a forum for community interaction and to serve as a vehicle for community concerns to be expressed as advice and recommendations to CDC and ATSDR.

Matters to be Discussed: Agenda items include DOE Research Program and discussion of the National Council on Radiation Protection and Measurement Report 136; Status Report on Dose Reconstruction; Biological Bases of Cancer; Projected Future Doses from Snake River Aquifer Contaminants; Idaho National Engineering and Environmental Laboratory (INEEL) Public Health Assessment; Combining Doses from Nevada Test Site Fallout, Global Fallout, and Hanford; and Presentation on INEEL Meteorological Issues. Agenda items are subject to change as priorities dictate.

Contact Person for More Information: Natasha Friday, Executive Secretary, INEELHES, Radiation Studies Branch, Division of Environmental Hazards and Health Effects, National Center for Environmental Health, CDC, 1600 Clifton Road, N.E. National Health And Nutrition Examination Survey III (NHANES) DNA Specimens: Guidelines for Proposals To Use Samples and Proposed Cost Schedule; Amendment

A notice announcing the availability of DNA Specimens from the National Health and Nutrition Examination Survey III (NHANES) with guidelines for proposals to use samples and a proposed cost schedule was published in the **Federal Register** on August 8, 2002, [Vol. 67 Number 153, Pages 51585-51589]. The notice is amended as follows:

(1) On page 51585, second column under Summary: replace the first sentence of the last paragraph with: Although all researchers are encouraged to submit letters of intent, proposals will be accepted without a letter of intent. If a researcher wishes to submit

a letter of intent the deadline (third column) will be extended to October 18, 2002. The NHANES program will review letters of intent to clarify any issues that may help in proposal development. Proposal application receipt deadline is November 18, 2002. All other dates are not changed.

(2) On page 51585, third column under Dates: delete the second bullet, Submission of Proposals: October 7, 2002.

(3) The following clarifications are added to the potential research proposals section: page 51586, first column, under the heading Potential Research Proposals: insert the following as paragraph 1:

If several researchers submit proposals for the same genetic assessments, they may be asked to collaborate in the publication of the estimates. The willingness to do this should be addressed in the proposal.

Umbrella category A proposals where researchers collaborate to use the same set of DNA specimens, to address several specific research questions, requiring different genetic assessments, are encouraged. In this case, each research question will be reviewed as a separate entity by the Technical Panel, but the fact that only one set of specimens will be used, will be noted.

(4) On page 51588, first column, first full paragraph, replace the first sentence

with the following: Although all researchers are encouraged to submit letters of intent, proposals will be accepted without a letter of intent.
