BILLING CODE 3410-30-P

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Agency Information Collection Activities; Proposed Collection; Comment Request; Supplemental Nutrition Assistance Program, Request for Administrative Review; Food Retailers and Wholesalers

AGENCY: Food and Nutrition Service, FNS, USDA.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice invites the general public and other public agencies to comment on this proposed information collection. This is a revision of a currently approved collection for SNAP, Request for Administrative Review.

DATES: Written comments must be received on or before June 8, 2015.

ADDRESSES: Comments are invited on (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions that were used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments may be sent to: Shanta Swezy, Branch Chief, Food and Nutrition Service, U.S. Department of Agriculture, 3101 Park Center Drive, Room 418, Alexandria, Virginia 22302. Comments may also be submitted via fax to the attention of Shanta Swezy at (703) 305-1863 or via email to rpmdhq-web@fns.usda.gov. Comments will also be accepted through the Federal eRulemaking Portal. Go to <http://www.regulations.gov>, and follow the online instructions for submitting comments electronically.

All responses to this notice will be summarized and included in the request for Office and Management and Budget approval. All comments will be a matter of public record.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Shanta Swezy, (703) 305-2238.

SUPPLEMENTARY INFORMATION:

Title: Request for Administrative Review.

OMB Number: 0584-0520.

Expiration Date: September 30, 2015.

Type of Request: Revision of a currently approved collection.

Abstract: The Food and Nutrition Service (FNS) of the U.S. Department of Agriculture is the Federal agency responsible for the Supplemental Nutrition Assistance Program (SNAP). The Food and Nutrition Act of 2008, as amended, (7 U.S.C. 2011-2036) requires that FNS determine the eligibility of retail food stores and certain food service organizations in order to participate in SNAP. If a food retailer or wholesale food concern is aggrieved by certain administrative action by FNS, that store has the right to file a written request for review of the administrative action with FNS.

Affected Public: Business-for-profit: Retail food stores and wholesale food concerns.

Estimated Number of Respondents: 1,457.

Number of Responses per Respondent: 1.2.

Estimated Total Annual Response per Respondent: 1,748.4.

Estimated Time per Response: Public reporting burden for this collection of information is estimated to average 0.17 of an hour per response.

Estimated Total Annual Burden on Respondents: 297.00 hours.

Dated: April 6, 2015.

Audrey Rowe,
Administrator, Food and Nutrition Service.

DEPARTMENT OF AGRICULTURE

Forest Service

Information Collection; National Woodland Owner Survey

AGENCY: Forest Service, USDA.

ACTION: Notice; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Forest Service is seeking comments from all interested individuals and organizations on the reinstatement with change for the information collection, National Woodland Owner Survey (NWOS).

DATES: Comments must be received in writing on or June 8, 2015 to be assured of consideration. Comments received after that date will be considered to the extent practicable.

ADDRESSES: Comments concerning this notice should be addressed to Brett Butler, USDA Forest Service, Northern Research Station, 160 Holdsworth Way, Amherst, MA 01003.

Comments also may be submitted via facsimile to 413-545-1860 or by email to bbutler01@fs.fed.us.

Comments submitted in response to this notice may be made available to the public through relevant Web sites and upon request. For this reason, please do

not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information. If you send an email comment, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. Please note that responses to this public comment request containing any routine notice about the confidentiality of the communication will be treated as public comments that may be made available to the public notwithstanding the inclusion of the routine notice.

The public may inspect the draft supporting statement and/or comments received at Northern Research Station during normal business hours. Visitors are encouraged to call ahead to 413-545-1387 to facilitate entry to the building. The public may request an electronic copy of the draft supporting statement and/or any comments received be sent via return email. Requests should be emailed to bbutler01@fs.fed.us.

FOR FURTHER INFORMATION CONTACT:

Brett Butler, by phone at 413-545-1387. Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 twenty-four hours a day, every day of the year, including holidays.

SUPPLEMENTARY INFORMATION:

Title: National Woodland Owner Survey

OMB Number: 0596-0078

Type of Request: Reinstatement with change

Abstract: There are an estimated 831 million acres of forest and other wooded land across the United States. Of this forest and other wooded land, 58 percent is owned by millions of corporations, families, individuals, tribes, and other private groups with the remaining 42 percent owned by over a thousand different Federal, State, and local government agencies. Understanding the attitudes and behaviors of the owners and managers of the forest and other wooded land is critical for understanding the current and future state of the nation's forests. The Forest Service conducts the NWOS to increase our understanding of:

- Who owns and manages the forest and other wooded lands of the United States;
- Why they own/manage it;
- How they have used it; and
- How they intend to use it.

This information is used by policy analysts, foresters, educators, and researchers to facilitate the planning

and implementation of forest policies and programs.

The Forest Service's direction and authority to conduct the NWOS is from the Forest and Range Land Renewable Resources Planning Act of 1974 and the Forest and Range Land Renewable Resources Act of 1978. These Acts assign responsibility for the inventory and assessment of forest and related renewable resources to the Forest Service. Additionally, the importance of an ownership survey in this inventory and assessment process is highlighted in section 253(c) of the Agricultural Research, Extension, and Education Reform Act of 1998 and the recommendations of the Second Blue Ribbon Panel on the Forest Inventory and Analysis program (FIA).

Previous iterations of the NWOS were conducted in 1978, 1993, 2002-2006, and 2011-2013. Approval for the last iteration of the NWOS expired on August 31, 2013. As planned, approval for the information collection was allowed to lapse after 2013 to permit a full assessment of the program that has now been completed. If reinstated, the NWOS will operate for another 3-year cycle.

Information will be collected related to:

- The characteristics of the land holdings;
- Attitudes and perceptions of the owners and managers;
- Resource uses and management activities; and
- Where applicable, landowner demographics.

Separate survey instruments are being developed for families and individuals, corporate, and public ownerships. In addition, the owners in urban areas will be sent a different survey instrument. For the families and individuals, the dominant ownership group of forest and other wooded land, a subset of ownerships will be sent survey instruments addressing the following topics, in addition to the core questions from the base survey instrument:

- Climate change;
- Wildfires;
- Invasive species;
- Land owner values; and
- Decision making.

The NWOS provides widely cited benchmarks for the number, extent, and characteristics of owners of forest and other wooded land in the United States. These results have been used to assess the sustainability of forest resources at national, regional, and State levels; to implement and assess forest-land owner assistance programs; and to answer a variety of questions with topics ranging from fragmentation to the economics of

timber production. This is the only effort to collect in-depth information about owners of forest and other wooded land at the national scale. It provides longitudinal data to track ownership trends and broad spatial data to allow for comparisons across regions of the country.

The respondents will be a statistically selected group of individuals, families, American Indian tribes, partnerships, corporations, nonprofit organizations, and other private groups that own forest and other wooded land in the United States in addition to a statistically selected group of Federal, State, and local government agencies that manage forest and other wooded land. A well distributed, random set of sampling points has been established across the country. At each point, remotely sensed data, such as aerial photographs or satellite imagery, will be used to identify forested/wooded points. For the forested/wooded points, public records will be used to identify the owners on record—the names and addresses of the landowners we will contact. The number of owners of forest and other wooded land to be contacted in each State will be a function of the number of owners of forest and other wooded land and the sampling intensity.

The NWOS will utilize a mixed-mode survey technique involving cognitive interviews, focus groups, self-administered questionnaires, and telephone interviews. Cognitive interviews will be used to test the questionnaires. Focus groups will be used to provide more in-depth understanding of the responses and to explore new areas of inquiry.

The implementation of the self-administered survey will involve up to four contacts. First, a pre-notice postcard will be sent to all potential respondents describing this information collection and why the information is being collected. Second, a questionnaire with a cover letter and pre-paid return envelope will be sent to the potential respondents. The cover letter will reiterate the purpose of this information collection and provide the respondents with all legally required information. Third, a reminder will be mailed to thank the respondents and encourage the non-respondents to reply. Those who have yet to respond will be sent a new questionnaire, cover letter, and pre-paid return envelope. Telephone interviews will be used for follow-up with non-respondents. For corporations and public agencies, the primary survey instrument will be electronic, and for all other owners, the primary survey instrument will be paper forms with the

option for completing the survey electronically online.

Forest Service researchers will coordinate all components of this information collection. Forest Service personnel with assistance provided by contractors and cooperators, such as university researchers, will conduct the mail portion of the survey, cognitive interviews, and focus groups. The U.S. Department of Agriculture, National Agricultural Statistics Service will conduct the telephone follow-ups. Data will be compiled and edited by Forest Service personnel with assistance provided by contractors and cooperators as appropriate. Forest Service researchers and cooperators will analyze the collected data. National, regional, and State-level results will be distributed through print and/or electronic media.

This information collection will generate scientifically-based, statically-reliable, up-to-date information about the owners of forest and other wooded land in the United States. The results of these efforts will provide more reliable information on this important and dynamic segment of the United States population; thus facilitating more complete assessments of the country's forest and other wooded land resources and improved planning and implementation of forestry programs on state, regional, and national levels.

Affected Public: Individuals and Households, the Private Sector (Businesses and Non-Profit Organizations, and/or State, Local or Tribal Government.

Estimate of Burden per Response: 25 minutes for families, individuals, and other private groups with small holdings; 30 minutes for corporations with large holdings; 15 minutes for public agencies.

Estimated Annual Number of Respondents: 7,925

Estimated Annual Number of Responses per Respondent: 1

Estimated Total Annual Burden on Respondents: 3,726

Comment is Invited:

Comment is invited on: (1) Whether this collection of information is necessary for the stated purposes and the proper performance of the functions of the Agency, including whether the information will have practical or scientific utility; (2) the accuracy of the Agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on

respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the submission request toward Office of Management and Budget approval.

Dated: April 2, 2015.

Carlos Rodriguez-Franco,
Associate Deputy Chief, Research & Development.

DEPARTMENT OF AGRICULTURE

Forest Service

Information Collection; Understanding Value Trade-offs Regarding Fire Hazard Reduction Programs in the Wildland-Urban Interface

AGENCY: Forest Service, USDA.

ACTION: Notice; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Forest Service is seeking comments from all interested individuals and organizations on the extension with no revision of a currently approved information collection, Understanding Value Trade-offs regarding Fire Hazard Reduction Programs in the Wildland-Urban Interface.

DATES: Comments must be received in writing on or before June 8, 2015 to be assured of consideration. Comments received after that date will be considered to the extent practicable.

ADDRESSES: Comments concerning this notice should be addressed to José Sánchez, USDA Forest Service, Pacific Southwest Research Station, 4955 Canyon Crest Drive, Riverside, California 92507.

Comments may also be submitted via facsimile to 951-680-1501, or by email to jsanchez@fs.fed.us.

The public may inspect comments received at the Pacific Southwest Research Station, during normal business hours. Visitors are encouraged to call ahead to facilitate entry to the building.

FOR FURTHER INFORMATION CONTACT: José Sánchez, by phone at 951-680-1560. Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Relay Service (FRS) at 1-800-877-8339 twenty-four hours a day,

every day of the year, including holidays.

SUPPLEMENTARY INFORMATION:

Title: Understanding Value Trade-offs regarding Fire Hazard Reduction Programs in the Wildland-Urban Interface.

OMB Number: 0596-0189.

Expiration Date of Approval: August 31, 2015.

Type of Request: Extension with revision.

Abstract: Forest Service and university researchers will contact recipients of a phone-mail-phone questionnaire and/or online questionnaire to help forest and fire managers understand value trade-offs regarding fire hazard reduction programs in the wildland-urban interface. Through those contacts, researchers will evaluate the responses of Arizona, Colorado, New Mexico, and Texas residents to different scenarios related to fire-hazard reduction programs, determine how effective residents think the programs are, and calculate how much residents would be willing to pay to implement the alternatives presented to them. This information will help researchers provide better information to natural resource, forest, and fire managers when they are contemplating the kind and type of fire-hazard reduction program to implement to achieve forestland management planning objectives.

A random sample of residents are contacted via random-digit dialed telephone calls and asked to participate in the research study and type of questionnaire (paper or online versions). Those agreeing to participate then answer a minimal set of questions to determine pre-existing knowledge of fuels reduction treatments and provide a mailing address, as well as agreeing to a date and time for an in-depth interview related to the mail questionnaire or to provide email address where to send them a link for an online questionnaire. After completion of the in-depth interview or online questionnaire, no further contact with the participants will occur.

A university research-survey center collects the information for mail/online questionnaires. A Forest Service researcher and collaborators at a cooperating university analyze the data collected. Both researchers are experienced in applied economic non-market valuation research and survey research methods.

The Forest Service, Bureau of Land Management, Bureau of Indian Affairs, National Park Service, Fish and Wildlife Service, as well as many State agencies
