On March 1, 2021, Solia 9 Hydroelectric, LLC filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Llano County Pumped Storage Project No. 15105-000 (Llano County Project, or project), a closed-loop pumped storage project to be located in Llano County, Texas. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed pumped storage project would consist of the following: (1) A 3,500 acre-foot upper reservoir with a maximum water surface elevation of 2,400 feet mean sea level (msl); (2) a

3,500 acre-foot lower, underground, reservoir composed of eight, 115,000-foot-long, concentric tunnels varying in diameter from 4,200 feet to 5,400 feet, with a maximum water surface elevation of -1,425 feet msl; (3) a pumping plant and water supply conduit connecting the upper reservoir to the Llano River; (4) a 2,800-foot-long, 16-foot-diameter underground, steel-lined penstock equipped with a bifurcation structure connecting the upper reservoir to the powerhouse; (5) a 200-foot-long, 70-foot-wide, 130-foot-high underground powerhouse containing two, 333-megawatt (MW) reversible pump-turbine units for a combined capacity of 666 MW; (6) a 500-foot-long, 345-kilovolt interconnection line leading from the powerhouse to an existing transmission line; (7) a 200-foot-long, 200-foot-wide substation; and (8) appurtenant facilities. The estimated annual generation of the Llano Project would be 1,450 gigawatt-hours.
