II. Information Specific to This Document

Two sections of the Clean Air Act govern the establishment and revision of the NAAQS. Section 108 (42 U.S.C. 7408) directs the Administrator to identify and list certain air pollutants and then to issue air quality criteria for those pollutants. The Administrator is to list those air pollutants that in her “judgment, cause or contribute to air pollution which may reasonably be anticipated to endanger public health or welfare;” “the presence of which in the ambient air results from numerous or diverse mobile or stationary sources;” and “for which * * * [the Administrator] plans to issue air quality criteria * * *.” Air quality criteria are intended to “accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of [a] pollutant in the ambient air * * *.” 42 U.S.C. 7408(b). Under section 109 (42 U.S.C. 7409), EPA establishes primary (health-based) and secondary (welfare-based) NAAQS for pollutants for which air quality criteria are issued. Section 109(d) requires periodic review and, if appropriate, revision of existing air quality criteria. The revised air quality criteria reflect advances in scientific knowledge on the effects of the pollutant on public health or welfare. The EPA is also required to periodically review and revise the NAAQS, if appropriate, based on the revised criteria. Section 109(d)(2) requires that an independent scientific review committee “shall complete a review of the criteria * * * and the national primary and secondary ambient air quality standards * * * and shall recommend to the Administrator any new * * * standards and revisions of existing criteria and standards as may be appropriate. * * *.” Since the early 1980’s, this independent review function has been performed by the Clean Air Scientific Advisory Committee (CASAC).

Presently, EPA is reviewing the NAAQS for Pb.¹ The First Draft ISA was released in early May (76 FR 26284) and reviewed by CASAC at a public meeting announced in a separate notice (76 FR 36120). The document that is the subject

of today’s notice considers the extent to which information and conclusions presented in the First Draft ISA provide support for the development of quantitative assessments of risk and exposure for health and/or welfare effects. This document is available on the EPA’s Technology Transfer Network Web site at http://www.epa.gov/ttn/naaqs/standards/pb/s_pb_index.html. The document is accessible in the “Documents from Current Review” section under “Planning Documents.”

The REA Planning Document has been made available for consultation with CASAC and for public comment. Comments should be submitted to the docket, as described above. The CASAC consultation on this planning document occurred on July 21, 2011. A separate **Federal Register** notice published on June 21, 2011 (76 FR 36120) provided additional details about this meeting and the process for participation. The document that is the subject of today’s notice does not represent and should not be construed to represent any final EPA policy, viewpoint, or determination.

The Commission also retained the current requirement in Section 43.61(a) that filing entities report their IMTS resale (*i.e.*, where an entity purchases IMTS calls from another provider and resells them to its customers) on a world-total basis.

The First Report and Order simplified the annual Section 43.61(a) report by amending subpart (a) of the rule to

eliminate the current requirement that filing entities separately report IMTS and private line traffic between the conterminous 48 states and offshore U.S. points such as Guam and the U.S. Virgin Islands and traffic between such offshore U.S. points and foreign points. OMB Control No.: 3060-0572.

Title: International Circuit Status Reports, 47 CFR 43.82.

Form No.: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Responses and Respondents: 75 respondents and 75 responses.

Estimated Time per Response: 1 hour-50 hours.

Frequency of Response: Annual reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. The Commission has authority for this information collection pursuant to the Communications Act of 1934 Sections 4, 48, 48 Stat. 1066, as amended, 47 U.S.C. 154 unless otherwise noted. Interpret or apply Sections 211, 219, 48 Stat. 1073, 1077, as amended; 47 U.S.C. 211, 219 and 220.

Total Annual Burden: 736 hours.

Total Annual Cost: None.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: In general there is no need for confidentiality with this collection of information.

Needs and Uses: On May 12, 2011, the Federal Communications Commission adopted a First Report and Order and Further Notice of Proposed Rulemaking (FCC 11–76) in Reporting Requirements for U.S. Providers of International Telecommunications Services, Amendment of Part 43 of the Commission's Rules, IB Docket No. 04–112 (rel. May 13, 2011). In the First Report and Order portion of that document (First Report and Order), the Commission amended the international reporting requirements in Section 43.82 that requires carriers annually to report the status of the international transmission circuits they owned or leased on December 31st of the preceding year. In the First Report and Order, the Commission also eliminated the circuit-addition report in Section 63.23(e) of the Commission's rules.

In the First Report and Order, the Commission retained the annual circuit-status report contained in Section 43.82, but eliminated the requirement that filing entities separately report circuits between the conterminous 48 states and offshore U.S. points such as Guam and the U.S. Virgin Islands and circuits between such offshore U.S. points and foreign points.

In the First Report and Order, the Commission also removed the requirement that filing entities file the circuit-addition report in section 63.23(e) of the rules. The Commission found that the section 43.82 annual circuit-status report provides enough information so that the circuit-addition report is no longer necessary. Section 63.23(e) required carriers that have been certified to resell international private lines for the provision of

telecommunications services to file each year the number of private line circuits they added and the service for which they were used. The Commission required this report because such service provider did not file the annual circuit-status report. The underlying carriers that provide the private lines that the resellers are using are required to report those circuits in their annual circuit-status report. As a result, we have a record that the circuits are used and do not need for the resellers also to report the same circuits.

Federal Communications Commission.

Secretary, Office of the Secretary, Office of Managing Director.

Needs and Uses: The rules adopted in the Open Internet Order establish a formal complaint process to address open Internet disputes that cannot be resolved through other means, including the Commission's informal complaint system. This process will permit anyone—including individual end users and edge providers—to file a claim alleging that another party has violated a rule, and asking the Commission to rule on the dispute. The formal complaint rules will facilitate prompt and effective enforcement of the rules adopted in the Open Internet Order, which is crucial to preserving an open Internet and providing clear guidance to stakeholders.
