Title: NSPS for Glass Manufacturing Plants (Renewal).

Abstract: The New Source Performance Standards (NSPS) for glass manufacturing plants, were proposed on June 15, 1979, and promulgated on October 7, 1980, and amended on October 19, 1984. These standards apply to any glass manufacturing facility for which construction or modification commences after June 15, 1979. The standards do not apply to hand glass melting furnaces, glass melting furnaces designed to produce less than 4.55 Mg (5 tons) of glass per day, or all-electric melters. Experimental furnaces are not subject to the emission standards at 40 CFR 60.292.

Owners or operators of the affected facilities described must make initial notifications, conduct and report on a performance test, demonstrate and report on continuous monitor performance, maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility. Semiannual reports are required. These notifications, reports, and records are required, in general, for all sources subject to NSPS. The recordkeeping and reporting requirements specific to glass manufacturing plants are detailed in the 40 CFR part 60, subpart CC. This information is being collected to assure compliance with 40 CFR part 60, subpart CC.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements, maintenance reports, and records. All reports are sent to the delegated State or Local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA Regional Office.

An agency respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average eight hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop,

acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Owners or operators of glass manufacturing plants.

Estimated Number of Respondents: 41.

Frequency of Response: On occasion, semiannually, and initially.

Estimated Total Annual Hour Burden: 803 hours.

Estimated Total Annual Costs: \$302,601, which includes \$0 annualized capital/startup costs, \$237,800 in annual O&M costs, and \$64,801 in Respondent Labor costs.

Changes in the Estimates: There is an increase of 213 burden hours as compared to the active ICR. The increase in burden from the most recently approved ICR is due to the fact that we are presently accounting for management and clerical person hours per year, which was not accounted for in the active ICR. There was however, a decline of four sources as compared to the active ICR. This decline was due to plant closure and the high cost to retrofit aging facilities, and corporate mergers.

Dated: October 17, 2005.

Sara Hisel-McCoy,

Acting Director, Collection Strategies Division.
