Animal and Plant Health Inspection Service

Title: Voluntary Bovine Johne's Disease Control Program.

OMB Control Number: 0579-NEW.

Summary of Collection: The Animal Health Protection Act of 2002 is the primary Federal law governing the protection of animal health. The law gives the Secretary of Agriculture broad authority to detect, control, or eradicate pests or diseases of livestock or poultry. The regulations in Title 9, Chapter 1, Subchapter C of the Code of Federal Regulations, govern the interstate movement of animals to prevent the dissemination of livestock and poultry diseases in the United States. Supplementing the regulations is the Uniform Program Standards for the Voluntary Bovine Johne's Disease Control Program that outlines the minimal national standards of the program providing specifics on administration of the program, program elements and procedures, and laboratory procedures.

Need and Use of the Information: The objective of this program is to provide minimum national standards for the control of Johne's disease. The program consists of three basic elements: (1) Education, to inform producers about the cost of Johne's disease and to provide information about management strategies to prevent, control, and eliminate it; (2) management, to work with producers to establish good management strategies on their farms; and (3) herd testing and classification, to help separate test-positive herds from test-negative herds. Failing to collect this information would greatly hinder the control of Johne's disease and possibly lead to increased prevalence.

Description of Respondents: State, Local or Tribal Government; Farms; Business or other for-profit

Number of Respondents: 50,602.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 70,515.
