In addition, the survey will collect information from the public on people's attitudes and values toward natural resources and their management. SUPPLEMENTARY INFORMATION:

Title: MyPyramid Tracker Information Collection for Registration, Login and Food Intake and Physical Activity Assessment.

OMB Number: Not yet assigned.

Expiration Date: Not applicable.

Type of Request: This is a new collection of information.

Abstract: MyPyramid Tracker (<http://www.mypyramidtracker.gov>) is an Internet based diet and physical activity self-assessment tool. It translates scientifically based guidance into practical information and promotes

nutrition education by increasing awareness of the quality of a person's diet. It allows users to input their daily food intakes and physical activity information and provides a quick summary measure of overall daily diet quality, activity status, and energy balance between 'energy in' and 'energy out' in terms of current guidance, which can be tracked for up to one year. Motivational education messages are generated and tailored to the user's personal assessment results. This data collection will be ongoing. The information collected will only be accessible by the user. Formative evaluation of functionalities and content of the Web site will be conducted with college students in collaboration with various universities. Testing will be completed prior to the release of any newly developed Web site enhancements to the general public.

Affected Public: American Consumers.

Estimated Number of Respondents: It has been established through MyPyramid Tracker activity over the past 4 months, that an estimated 75,000

(average per month) new account registrants and 72,349 active users (average per month) have entered food and physical activity data for at least one day. From the active users it is estimated that approximately 1% will continue to use the Tracker on a daily basis for up to one year. This would equate to approximately 725 repeat users each month who would visit the site on a daily basis for up to 1 year. We are estimating that there will be 900,000 respondents for registration, login and one-time users yearly. For repeat users we estimate there will be 8,700 respondents, who will take advantage of daily food and physical activity assessments for up to one year. The number of subjects to be included in formative evaluation is estimated to be about 300 college students, who will be using the same login process for 3-days of food intake and physical activity data.

Estimated Time per Response:

1 minute for registration.

.5 minutes for login.

30 minutes for food and physical activity data entry for one-day.
