DEPARTMENT OF COMMERCE

Census Bureau

Proposed Information Collection; Comment Request; Redistricting Data Program

AGENCY: U.S. Census Bureau, Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3506(c)(2)(A)).

DATES: To ensure consideration, submit written comments, on or before September 14, 2015. The deadline for states to notify the Census Bureau that they wish to participate in Phase 1, the Block Boundary Suggestion Project (BBSP), is December 15, 2015.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at jjessup@doc.gov).

FOR FURTHER INFORMATION CONTACT:

Direct requests for additional information or copies of the information

collection instrument(s) and instructions to James Whitehorne, U.S. Census Bureau, 4600 Silver Hill Road, Washington, DC 20233 (or via the Internet at rdo@census.gov).

SUPPLEMENTARY INFORMATION:

I. Abstract

The mission of the Geography Division (GEO) within the Census Bureau is to plan, coordinate, and administer all geographic and cartographic activities needed to facilitate Census Bureau statistical programs throughout the United States and its territories. GEO manages programs that continuously update features, boundaries, addresses, and geographic entities in the Master Address File/Topologically Integrated Geographic Encoding and Referencing (MAF/TIGER) System. GEO, also, conducts research into geographic concepts, methods, and standards needed to facilitate Census Bureau data collection and dissemination programs.

The Census Bureau is requesting a new collection to cover the five phases of the Redistricting Data Program (RDP) that was originally part of the Geographic Partnership Programs (GPPs) generic clearance. The Census Bureau requests a three-year clearance and a project specific Office of Management and Budget (OMB) Control Number for RDP. GEO, in coordination with OMB is creating a separate clearance for this critical program. A project specific clearance allows the Census Bureau to provide RDP specific materials, burden hours, and procedures. The need to only provide RDP materials ensures the program phases are uninterrupted by other program clearances unrelated to RDP. The RDP specific clearance provides flexibility in the timing, allowing the program to establish the schedule for RDP clearance needs and renewal.

Under the provisions of Title 13, Section 141(c) of the United States Code (U.S.C.), the Secretary of Commerce (Secretary) is required to provide the "officers or public bodies having initial responsibility for the legislative apportionment or districting of each state . . ." with the opportunity to specify geographic areas (e.g., voting districts) for which they wish to receive Decennial Census population counts for the purpose of reapportionment or redistricting.

By April 1 of the year following the Decennial Census, the Secretary is required to furnish the state officials or their designees with population counts for American Indian areas (AIAs), counties, cities, census blocks, and

state-specified congressional, legislative, and voting districts.

The Census Bureau has issued an invitation to the officers or public bodies having initial responsibility for legislative reapportionment and redistricting, through the Census Redistricting Data Office (RDO), inviting states to identify a non-partisan liaison that will work directly with the Census Bureau on the 2020 Census RDP.

Since the 1990 Census, participation in both the Census RDP Block Boundary Suggestion Project (BBSP) and Voting District Project (VTDP), 2020 Census RDP Phases 1 and 2 under Title 13, U.S.C., is voluntary on the part of each state. However, if states choose not to participate in Phase 1 and Phase 2, the Census Bureau cannot ensure that the 2020 Decennial Census tabulation geography will support the redistricting needs of their state.

II. Method of Collection

The RDP invites respondent participation in the following phases of the program:

Phase 1: BBSP

The purpose of the BBSP is to afford states the opportunity to identify non-standard features often used as electoral boundaries (such as a power line or stream, rather than a street centerline, which might divide voters into two districts) as Census block boundaries. The BBSP option affords the state liaison the opportunity to provide suggestions for 2020 Census tabulation block boundaries resulting in more meaningful block data for the state. Liaisons are able to work with local officials including county election officers and others to ensure local geography is represented in the 2020 Census tabulation block inventory. In addition, the liaison, on behalf of the state, will make suggestions for features not desirable as census tabulation blocks. By identifying undesirable features, the liaison may assist the Census Bureau in reducing the overall number of census tabulation blocks from the 2010 inventory. Beginning in late fall of 2015, states that choose to participate in Phase 1 will begin receiving guidelines and training for providing their suggestions for the 2020 Census tabulation blocks as well as their suggestions for exclusion of line segments for consideration in the final 2020 Census tabulation block inventory. For the first time, states will have the opportunity to review legal limits, such as county and incorporated place boundaries, as reported through the Boundary and Annexation Survey (BAS). The Census Bureau conducts the

BAS annually to update information about the legal boundaries and names of all governmental units. The alignment of the BAS with the BBSP will facilitate the cooperation between state and local government. A verification phase will occur in early 2017.

Phase 2: VTDP

The VTDP will provide the state liaison, on behalf of the state, to submit the voting districts (a generic term used to represent areas that administer elections such as precincts, election districts, wards, etc.) to the Census Bureau for representation in the 2020 Census Public Law 94-171 products (data and geographic products). Beginning in late 2017, states that choose to participate in VTDP will receive on a flow basis, geographic products that allow them the opportunity to update the Voting Districts (VTDs) for inclusion in the 2020 Census tabulation geography. State liaisons will continue to align their effort with updates from state and local government officials participating in the BAS. The VTD/BAS update and alignment will continue through spring of 2018. A verification phase will occur in early 2019 for states that participated in VTDP.

Phase 3: Delivery of the 2020 Decennial Census Redistricting Data

By April 1, 2021, the Director of the Census Bureau will, in accordance with Title 13, U.S.C., furnish the Governor and state legislative leaders, both the majority and minority, with 2020 Census population counts for standard census tabulation areas (e.g., state, Congressional district, state legislative district, AIA, county, city, town, census tract, census block group, and census block) regardless of a state's participation in Phase 1 or 2. The Director of the Census Bureau will provide 2020 Census population counts for those states participating in Phase 2, for both the standard tabulation areas and for VTDs. For each state, this delivery will occur prior to general release and no later than April 1, 2021.

Phase 4: Collection of Post-Census Redistricting Data Plans

2010 Census:

As begun in 2011, the Census Bureau will solicit from each state the newly drawn legislative and Congressional district plans and prepares appropriate data sets based on the new districts. This effort will occur every two years in advance of the 2020 Census in order to update these boundaries with new or changed plans. A verification phase will occur with each update.

2020 Census:

Beginning in 2021, the Census Bureau will solicit from each state the newly drawn legislative and Congressional district plans and prepares appropriate data sets based on the new districts. This effort will occur every two years in advance of the 2030 Census in order to update these boundaries with new or changed plans. A verification phase will occur with each update.

Phase 5: Review of the 2020 Census RDP and Recommendations for the 2030 Census RDP

As the final phase of the 2020 Census RDP, the Census Bureau will work with the states to conduct a thorough review of the RDP. The intent of this review, and the final report that results, is to provide guidance to the Secretary and the Census Bureau Director in planning the 2030 Census RDP.
