Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Aerospace Manufacturing and Rework Facilities (40 CFR part 63, subpart GG) apply to existing and new aerospace manufacturing and rework facilities where the total hazardous air pollutants (HAP) emitted are greater than or equal to 10 tons per year of any combination of HAP, or where the total HAP emitted are greater than or equal to 25 tons per year of any combination of HAP. New facilities include those that commenced construction or reconstruction after the date of proposal. Operations covered include: Cleaning, primer and top coat application, repainting, chemical milling maskant application, handling and storage of waste, and specialty coating operations. This information is being collected to assure compliance with 40 CFR part 63, subpart GG.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities: Aerospace manufacturing and rework facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63 Subpart GG).
Estimated number of respondents: 144 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 154,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$15,500,000 (per year), which includes \$144,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in the burden hours or cost in this ICR compared to the hours and costs described in supporting statement for the previous ICR. This is due to two considerations. First, the regulations have had no significant changes over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory recordkeeping and reporting

requirements and there is no significant industry growth, the labor hours and cost figures in the previous ICR are used in this ICR and there is no change in burden to industry.

Courtney Kerwin,

Director, Regulatory Support Division.
