

Issues

Issues are described in detail on pages 13 to 16 in the Rimrock FEIS and include: (1) Vegetation removal as a management tool and (2) Water Quality and Fish Habitat.

Comment Requested

This notice of intent initiates the scoping process that guides the development of the supplement to the environmental impact statement. We are seeking comments on a forest plan amendment to change the HEI of 70 to 67 within the C3 Management Area on the site-specific project of the Rimrock Ecosystem Restoration Projects on the Umatilla National Forest. All comments previously received during scoping and in response to the DEIS will remain part of the project record.

Early Notice of Importance of Public Participation in Subsequent Environmental Review

A supplemental draft environmental impact statement will be prepared for comment. The comment period on the supplemental draft environmental impact statement will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the FEIS.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the supplemental draft

environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the supplemental draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement.

Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Comments received, including the names and addresses of those who comment, will be considered part of the public record on this proposal and will be available for public inspection.
