

expected to cause impacts significantly greater than current operations. Therefore, the proposed action of implementing the EPU for CR-3 will not have a significant effect on the quality of the human environment because no significant permanent changes are involved, and the temporary impacts are within previously disturbed areas at the site and the capacity of the plant systems. Accordingly, the NRC has determined it is not necessary to prepare an environmental impact statement for the proposed action.

Dated at Rockville, Maryland, this 8th day of January, 2013.

For The Nuclear Regulatory Commission.
