

the colder months, no dredging or blasting will occur seaward of the Third Harbor Tunnel between December 1 and March 31.

- A marine mammal observer will be on board the scows transiting to the MBDS from February 1 to May 31 to avoid potential ship strikes with marine mammals, and in particular the North Atlantic Right Whale.

- Rock removed from the Presidents Road Anchorage area will be placed within a new area of the MBDS to increase habitat diversity.

- The dredge contractor will provide advance notice to the lobstermen on anticipated significant dredge movements.

- The dredge contractor will maintain a short tow while inside Boston Harbor to minimize disruption of lobster pots.

Based on incorporation of the above mitigation measures, the experience gained during construction of the BHNIP, and lack of any water quality violations or other significant effects from the BHNIP, no significant impacts to the environment are expected from the Boston Harbor Inner Harbor Maintenance Dredging Project. All practicable means to avoid or minimize adverse environmental effects have been incorporated into the recommended plan. The public interest will best be served by implementing maintenance dredging as identified and described in the Supplemental Environmental Impact Report.
