SUPPLEMENTARY INFORMATION:

1. Introduction

The Ronald Reagan National Defense Authorization Act for Fiscal Year 2005 (NDAA) authorizes the U.S. Department of Energy (DOE), in consultation with the Nuclear Regulatory Commission (NRC), to determine whether certain radioactive waste related to the reprocessing of spent nuclear fuel is not high-level waste, provided certain criteria are met. The NDAA also requires NRC to monitor DOE disposal actions to assess compliance with 10 CFR Part 61, Subpart C, performance objectives for low-level waste.

On September 7, 2005, DOE submitted a draft waste determination for residual waste incidental to reprocessing, including sodium bearing waste, stored in the Idaho Nuclear Technology and Engineering Center (INTEC) Tank Farm Facility (TFF) to demonstrate compliance with the NDAA criteria including demonstration of compliance with the performance objectives in 10 CFR Part 61, Subpart C. In its consultation role, the NRC staff reviewed the draft waste determination and concluded that the NDAA criteria could be met for residual waste stored in the INTEC TFF. NRC documented the results of its review in a technical evaluation report (TER) issued in October 2006. DOE issued a final waste determination in November 2006 taking into consideration the assumptions, conclusions, and recommendations

documented in NRC's TER (ML062490142).

To better inform the public on the NRC's activities under the NDAA, NRC is holding this public meeting in Idaho Falls, Idaho to provide the public with a clear understanding of NRC's activities on the implementation of the NDAA and the review of DOE's waste determination for the INTEC TFF. The NRC staff will also provide an overview of its planned monitoring activities.

RAILROAD RETIREMENT BOARD

Proposed Collection; Comment Request

Summary: In accordance with the requirement of Section 3506 (c)(2)(A) of the Paperwork Reduction Act of 1995 which provides opportunity for public comment on new or revised data

collections, the Railroad Retirement Board (RRB) will publish periodic summaries of proposed data collections.

Comments are invited on: (a) Whether the proposed information collection is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the RRB's estimate of the burden of the collection of the information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden related to the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Title and purpose of information collection: Placement Service; OMB 3220-0057 Section 12(i) of the Railroad Unemployment Insurance Act (RUIA), authorizes the Railroad Retirement Board (RRB) to establish, maintain, and operate free employment offices to provide claimants for unemployment benefits with job placement opportunities. Section 704(d) of the Regional Railroad Reorganization Act of

1973, as amended, and as extended by the consolidated Omnibus Budget Reconciliation Act of 1985, required the RRB to maintain and distribute a list of railroad job vacancies, by class and craft, based on information furnished by rail carriers to the RRB. Although the requirement under the law expired effective August 13, 1987, the RRB has continued to obtain this information in keeping with its employment service responsibilities under Section 12(k) of the RUIA. Application procedures for the job placement program are prescribed in 20 CFR 325. The procedures pertaining to the RRB's obtaining and distributing job vacancy reports furnished by rail carriers are described in 20 CFR 346.1.

The RRB currently utilizes four forms to obtain information needed to carry out its job placement responsibilities. Form ES-2, Supplemental Information for Central Register, is used by the RRB to obtain information needed to update a computerized central register of separated and furloughed railroad employees available for employment in the railroad industry. Form ES-21,

Referral to State Employment Service, and ES-21c, Report of State Employment Service Office, are used by the RRB to provide placement assistance for unemployed railroad employees through arrangements with State Employment Service offices. Form UI-35, Field Office Record of Claimant Interview, is used primarily by RRB field office staff to conduct in-person interviews of claimants for unemployment benefits. Completion of these forms is required to obtain or maintain a benefit. In addition, the RRB also collects Railroad Job Vacancies information received voluntarily from railroad employers.

The RRB proposes minor, non-burden impacting editorial changes to Form ES-2, minor non-burden impacting editorial and reformatting changes to Form ES-21, and a minor non-burden impacting change to Form UI-35. No changes are being proposed to Form ES-21c or to the Railroad Job Vacancies Report.

The estimated annual respondent burden for this collection is as follows:

ESTIMATE OF ANNUAL RESPONDENT BURDEN

Form Nos.	Annual responses	Completion time (min)	Burden (hrs)
ES-2	7,500	0.25	31
ES-21	3,500	0.68	40
ES-21c	1,250	1.50	31
UI-35 (in person)	9,000	7.00	1,050
UI-35 (by mail)	1,000	10.50	175
Railroad Job Vacancies Report	750	10.00	125
Total	23,000	1,452

Additional Information or Comments: To request more information or to obtain a copy of the information collection justification, forms, and/or supporting material, please call the RRB Clearance Officer at (312) 751-3363 or send an e-mail request to Charles.Mierzwa@RRB.GOV. Comments regarding the information collection should be addressed to Ronald J. Hodapp, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611-2092 or send an e-mail to Ronald.Hodapp@RRB.GOV. Written comments should be received within 60 days of this notice.
