

Ontario, Canada. Ontario Energy's direct parent is Ontario Energy Trading, Inc., a Delaware corporation, which in turn is owned by Ontario Power Generation Energy Trading, Inc., an Ontario corporation. OPG, through various subsidiary corporations, owns and operates power plants and related generation assets. OPG does not own transmission or distribution assets. OPG's generation assets previously were owned by Ontario Hydro, the former government-owned utility providing generation, transmission and certain distribution services in Ontario.

Ontario Energy proposes to arrange for the delivery of electric energy to Canada over the existing international transmission facilities owned by Basin Electric Power Cooperative, Bonneville Power Administration, Citizen Utilities, Eastern Maine Electric Cooperative, International Transmission Company, Joint Owners of the Highgate Project, Long Sault, Inc., Maine Electric Power Company, Maine Public Service Company, Minnesota Power Inc., Minnkota Power Cooperative, New York Power Authority, Niagara Mohawk Power Corporation, Northern States Power, and Vermont Electric Transmission Company. The construction, operation, maintenance, and connection of each of the international transmission facilities to be utilized by Engage America, as more fully described in the application, has previously been authorized by a Presidential permit issued pursuant to Executive Order 10485, as amended.

The applicant anticipates that the electric power market in the Province of Ontario will be opened to competition on May 1, 2002. Ontario Energy has requested expedited processing of its application so that it may participate in this competitive market during the summer peak period. Accordingly, DOE has set a 15-day comment period for this proceeding.
