SUPPLEMENTARY INFORMATION: We are currently in the process of collaborating with the U.S. Department of Agriculture (USDA) to develop a way to utilize USDA's existing information collection(s) to gather the data required for our purposes. We anticipate that the collaboration process with the USDA will be complete before further renewal of this information collection is required.

Title: Crop Acreage and Yields and Water Distribution.

Abstract: The annual crop census is taken on certain Reclamation projects primarily for use as a tool in administering, managing, and

evaluating various aspects of the Federal reclamation program. The census is used to assist in the administration of repayment and water service contracts, which are used to repay the irrigators' obligation to the Federal government. The census will provide data to facilitate the required 5-year review of ability-to-pay analysis, which is being incorporated into new repayment and water service contracts. The basis for these reviews is an audit by the Office of the Inspector General, Department of the Interior.

Data from the census are utilized to determine class 1 equivalency computation; *i.e.*, determining the number of acres of class 2 and class 3 land that are required to be equivalent in productivity to class 1 land.

In recent years, the census has provided data which are used to administer international trade agreements, such as the North American Free Trade Agreement. Data from the census are also used by the Office of the Inspector General, Government Accountability Office, and the Congressional Research Service to independently evaluate our program and to estimate the impacts of proposed legislation. These data are supplied to other Federal and State agencies to evaluate the program and provide data for research.
