ENVIRONMENTAL PROTECTION AGENCY

[FRL-7129-8]

Designation and Support for Local Resource Centers To Assist Public Entities Develop Environmental Management Systems (EMS)

AGENCY: Environmental Protection Agency.

ACTION: Notice; announcement of a program to assist not-for-profit organizations that wish to work with public entities that wish to adopt environmental management systems (EMS); request for applications.

SUMMARY: The Environmental Protection Agency (EPA) announces its intention to select and provide technical assistance for up to five existing not-for-profit organizations in order to increase their capacity to assist public entities wishing to adopt environmental management systems (EMS). The assistance provided to these organizations will include helping with developing business plans, providing relevant EMS materials to facilitate each organization's existing EMS assistance activities, train-the-trainer work sessions on ways to address the needs of public agencies, and other marketing services. Each organization selected will also gain increased visibility, attention, and recognition of the key role they can play in meeting the growing needs of public agencies wishing to adopt EMSs.

This program is a continuation of two highly successful projects led by U.S. EPA to directly support various public agencies as they develop EMSs. The program is designed to build on these efforts by increasing the capacity of existing EMS service providers to meet the needs of public agencies. This project is being led by EPA's Office of Water, in conjunction with EPA's Office of Air and Radiation and Office of Compliance.
