

per firm totaling 390 hours per firm (3 hours × 130 days). In addition, to produce labels and apply labels on the newly manufactured lawn mowers, one hour daily is estimated for each firm during the production cycle for a total of 130 hours per firm (1 hour × 130 days).

Total Estimated Annual Burden: 9,750 hours on testing and recordkeeping (25 firms × 390 hours) and 3,250 hours for labeling (25 firms × 130 hours) for a total annual burden of 13,000 hours per year.

General Description of Collection: In 1979, the Commission issued the Safety Standard for Walk-Behind Power Lawn Mowers (16 CFR part 1205) to address blade contact injuries. Subpart B of the standard sets forth regulations prescribing requirements for a reasonable testing program to support certificates of compliance with the standard for walk-behind power lawn mowers. 16 CFR part 1205, subpart B.

In addition, section 14(a) of the CPSA (15 U.S.C. 2063(a)) requires manufacturers, importers, and private labelers of a consumer product subject to a consumer product safety standard to issue a certificate stating that the product complies with all applicable consumer product safety standards. Section 14(a) of the CPSA also requires that the certificate of compliance must be based on a test of each product or upon a reasonable testing program. The information collection is necessary because these regulations require manufacturers and importers to establish and maintain records to demonstrate compliance with the requirements for testing and labeling to support the certification of compliance.

Secretary, Consumer Product Safety Commission.
