Regulatory Amendment 35 to the Snapper Grouper FMP

Regulatory Amendment 35 considers revisions to South Atlantic red snapper catch levels following the most recent stock assessment (SEDAR 73) and gear changes intended to reduce dead discards throughout the snapper grouper fishery. SEDAR 73 indicated the stock is overfished and overfishing is occurring, primarily due to high numbers of recreational dead discards of red snapper. The Council is required to revise the acceptable biological catch to be based on the Scientific and Statistical Committee's (SSC) most recent recommendations, which are based on SEDAR 73.

The Council is also required to end overfishing of red snapper. Given that the vast majority of red snapper fishing-related mortality is attributed to recreational dead discards and given the multi-species nature of the South Atlantic snapper grouper fishery, the Council is considering a prohibition of the use of more than one separate hook per line while recreationally fishing for snapper grouper species with natural baits. This gear change would be expected to reduce recreational catch and discarding of snapper grouper species overall, thus reducing dead discards and addressing overfishing of red snapper. The actions considered in this amendment in addition to increased outreach and education efforts for best fishing practices, and other longer-term management actions currently under development, are collectively expected to end overfishing of red snapper.

Special Accommodations

These hearings are physically accessible to people with disabilities. Requests for auxiliary aids should be directed to the Council office (see **ADDRESSES**) 5 days prior to the hearing.
