

consumer's report is not obtained without a permissible purpose;

- strengthen the monitoring and testing function to respond to agent violations more quickly; and
- report to the board quarterly on the number of complaints and disputes involving consumer reports obtained without a permissible purpose.

4. Conclusion

Supervision's work in the consumer reporting market is ongoing and remains a high priority. Consumer reporting companies and furnishers have an obligation to maintain the accuracy of consumer data, but experience indicates that they lack incentives and under-invest in accuracy. Indeed, these most recent supervisory findings underscore Supervision's concern about the lack of resources that furnishers in particular have devoted to this important function and the resulting violations of law.

We have targeted substantial resources to improve the accuracy of consumer information, and we will continue to do so. We have observed steady progress at consumer reporting companies to improve data governance. However, we also observed that one or more CRCs have not yet finalized the development of data governance programs as required by Supervision, although such improvements are reported to be in the implementation phase. As to furnisher monitoring programs, Supervision found one or more CRCs made significant progress in leveraging furnisher dispute data as part of an accuracy program. But Supervision also observed that one or more programs require additional development and formalization of the corrective actions taken for furnishers that have been identified through the monitoring program. Overall, we are satisfied with the steady pace of progress in addressing weaknesses identified in Supervision's first round of accuracy and dispute resolution reviews and will continue to work with supervised companies to ensure that they invest the necessary resources to solve compliance challenges.

Supervision will continue to conduct reviews at a wide range of furnishers subject to our authority and expects furnishers to evaluate carefully their entire operations as they relate to their furnishing practices in light of the FCRA and Regulation V's requirements. We are encouraged by some positive trends. For example, at one or more large furnishers, Supervision observed a special emphasis on evaluating, on an enterprise-wide basis, the furnisher's FCRA compliance management system. In addition, furnisher(s) proactively

established action plans for recordkeeping and taking inventory of dispute resolution letters that they will more clearly communicate the results of investigations to consumers.

Supervision will continue to prioritize new and existing FCRA areas based on insights from a robust number of data sources that help us to identify areas where the risk of consumer harm is greatest.

Dated: March 22, 2017.

Richard Cordray,

Director, Bureau of Consumer Financial Protection.
