

harmonize FMVSS No. 225 with the comparable Transport Canada requirement.”

(4) The seat design is such that only one label at a seating position can be noncompliant. As the seat cover is constructed, the labels are secured to the fabric a specified distance apart that reflects the location of each pair of anchorages, and the labels are designed to be within the lateral tolerance of the standard.

(5) Information provided in the vehicle owner’s manual further reduces any possibility of confusion when installing a child restraint. The instructions clearly advise the installer to recline the second row seat and widen the gap between the seat cushion and the seatback to expose the lower anchorages.

(6) The label locations are correct for the LATCH anchorage system located at the third row center seating position.<sup>3</sup>

(7) There have been no customer complaints, injuries, or accidents related to the deviation of the child restraint label location being slightly outside the limits of the requirement.

In addition, Toyota stated that the model year 2011 Sienna is sold by Toyota in both the United States and Canada and the subject noncompliance was reported to both NHTSA and Transport Canada at the same time. (In Canada, the applicable standard is CMVSS 210.2; it contains the same requirements as FMVSS No. 225). Transport Canada responded on March 23, indicating it concurs that “there is no real or implied degradation to motor vehicle safety,” and that no further action in Canada will be required.

In summation, Toyota believes that the described noncompliance of the subject vehicles is inconsequential to motor vehicle safety, and that its petition, to exempt from providing recall notification of noncompliance as required by 49 U.S.C. 30118 and remedying the recall noncompliance as required by 49 U.S.C. 30120 should be granted.

**NHTSA Decision**

*Requirement Background:* The purpose for the locational requirements

for the label identifying the location of the lower child restraint anchorage is to assure that the installer of a child restraint system is readily able to locate the appropriate lower child restraint anchorages.

*NHTSA’s Analysis of Toyota’s Reasoning*

After review of the subject petition NHTSA agrees with Toyota that the location of the subject lower child restraint anchorage is in-line with the nonconforming location of the lower child restraint anchorage label, and the Owner’s manual provided with the vehicles includes a description of the location of the anchorages in sufficient detail to allow the person installing a child seat to readily locate the anchorage.

*NHTSA Conclusions*

NHTSA agrees with Toyota’s assessment that while the location of the subject lower child restraint anchorage label is outside of the allowable tolerance relative to the location of the anchorage that this would not prevent the installer of a child restraint system from being readily able to locate the lower child restraint anchorage.

*Decision*

In consideration of the foregoing, NHTSA has decided that Toyota has met its burden of persuasion that the FMVSS No. 225 noncompliance in the vehicles identified in Toyota’s Noncompliance Information Report is inconsequential to motor vehicle safety. Accordingly, Toyota’s petition is granted and the petitioner is exempted from the obligation of providing notification of, and a remedy for, that noncompliance under 49 U.S.C. 30118 and 30120.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the

defect or noncompliance. Therefore, this decision only applies to the vehicles that Toyota no longer controlled at the time that it determined that a noncompliance existed in the subject vehicles.

**Actions on Special Permit Applications**

**AGENCY:** Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

**ACTION:** Notice of actions on Special Permit Applications.

**SUMMARY:** In accordance with the procedures governing the application for, and the processing of, special permits from the Department of Transportation’s Hazardous Material Regulations (49 CFR part 107, subpart B), notice is hereby given of the actions on special permits applications in February to April 2012. The mode of transportation involved are identified by a number in the “Nature of Application” portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo aircraft only, 5—Passenger-carrying aircraft. Application numbers prefixed by the letters EE represent applications for Emergency Special Permits. It should be noted that some of the sections cited were those in effect at the time certain special permits were issued.

Dated: Issued in Washington, DC, on May 8, 2012.

#### Applications for Modification of Special Permit

**AGENCY:** Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

**ACTION:** List of Applications for Modification of Special Permits.

**SUMMARY:** In accordance with the procedures governing the application for, and the processing of, special permits from the Department of Transportation's Hazardous Material Regulations (49 CFR part 107, subpart B), notice is hereby given that the Office of Hazardous Materials Safety has

received the applications described herein. This notice is abbreviated to expedite docketing and public notice. Because the sections affected, modes of transportation, and the nature of application have been shown in earlier **Federal Register** publications, they are not repeated here. Requests for modification of special permits (e.g. to provide for additional hazardous materials, packaging design changes, additional mode of transportation, etc.) are described in footnotes to the application number. Application numbers with the suffix "M" denote a modification request. These applications have been separated from the new application for special permits to facilitate processing.

**DATES:** Comments must be received on or before June 1, 2012.

**ADDRESSES:** *Address Comments To:* Record Center, Pipeline and Hazardous Materials Safety Administration, U.S.

Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate. If confirmation of receipt of comments is desired, include a self-addressed stamped postcard showing the special permit number.

#### FOR FURTHER INFORMATION CONTACT:

Copies of the applications are available for inspection in the Records Center, East Building, PHH-30, 1200 New Jersey Avenue Southeast, Washington DC or at <http://regulations.gov>.

This notice of receipt of applications for modification of special permit is published in accordance with Part 107 of the Federal hazardous materials transportation law (49 U.S.C. 5117(b); 49 CFR 1.53(b)).

Issued in Washington, DC, on May 8, 2012.
