Systems thinking is important for job success in areas such as cyber security, engineering, and mission planning. As an assessment, the Systems Thinking Abilities game needs to be evaluated to ensure it measures what is intended and relates to performance in jobs that require systems thinking. This Information Collection will follow best practices in assessment development by collecting feedback about the ease of use, clarity, and usability from individuals who complete the Systems Thinking Abilities game and by collecting demographic information about those individuals to ensure they are similar to

the intended end users. The game players are freelance workers from Amazon's Mechanical Turk (MTurk) site who will be paid to play the Systems Thinking Abilities game and respond to the questions included in this information collection. Respondents will not be sent invitations to participate, instead they can sign up to participate through the MTurk website. Each participant will complete the Systems Thinking Abilities game, the evaluation questions and the demographic information using his or her computer from a location of his or her choice. The ARI Game Evaluation Form will be linked through the MTurk site and responses will be entered and returned online. Once participants complete their assigned section(s) they will be paid for their time through MTurk. Data will be analyzed following completion of data collection activities.

Evaluation Questions: Participants will respond to a series of multiple choice and open-ended questions to capture their experience with the Systems Thinking Abilities game. These questions are included on the ARI Game Evaluation Form. The collected data will be retrieved and processed by Personnel Decisions Research Institutes (PDRI), a contractor working for ARI. Summary statistics will be generated and the open-ended feedback will be content coded. The information collected on participant feedback will be used to identify modifications needed to the software to improve the clarity or ease of use. Findings will be documented in a technical report.*Demographic Questions:* Participants will complete questions through an online survey format regarding demographics and background experiences. Demographic questions include age, gender, ethnicity, race, education attainment, and experience questions related to past experience with computer technology. These questions are included on the ARI Game Evaluation Form. The collected data will be retrieved and processed by PDRI. The demographic information will be documented in a technical report describing the initial testing.*Affected Public:* Individuals or households.*Frequency:* One-time collection.*Respondent's Obligation:* Voluntary.*OMB Desk Officer:* Ms. Jasmeet Seehra.

Needs and Uses: This collection is necessary to collect essential personal information on foreign national students attending the National Defense University. The information collected is used to create profiles for the international students that ensures their needs are met as they transition to their time living in the United States as a student. It also helps them secure driving licenses, common access cards, facility identification number, temporary lodging assignment payments, and a defense travel system profile. Their preliminary information, including name, service, past assignments, etc. is collected via email correspondence while they are still in their home country. More sensitive information such as passport information, Date of Birth, Visa # and their FIN are collected either in person or over the WhatsApp messaging service, utilizing their end-to-end encryption. All student information is stored in a database that is only accessible to members of our office.

Affected Public: Individuals or households (Foreign Nationals).

Frequency: Annually.

Respondent's Obligation: Voluntary.
