BILLING CODE 5001-06-C

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board

AGENCY: Department of Defense.

ACTION: Notice of advisory committee meetings.

SUMMARY: The Defense Science Board 2006 Summer Study on Information Management for Net-Centric Operations will meet in closed session on *April 20-21, 2006, May 18-19, 2006, and July 18-19, 2006*; at Systems Planning Corporation; and on *June 15, 2006*, at Strategic Analysis Inc. The address for both locations is 3601 Wilson Boulevard, 3rd Floor, Arlington, VA. These meetings continue the task force's work and will consist of classified and proprietary briefings on current technologies and programs.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition, Technology & Logistics on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings, the Defense Science Board Task Force will: Assess the features and capabilities VTOL/STOL aircraft should have in order to support the nation's defense needs through at least the first half of the 21st century.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. 92-463, as amended (5 U.S.C. App. II), it has been determined that these Defense Science Board Task Force meetings concern matters listed in 5 U.S.C. 552b(c)(1) and that, accordingly, the meetings will be closed to the public.

FOR FURTHER INFORMATION CONTACT:

LtCol Scott Dolgoff, USA, Defense Science Board, 3140 Defense Pentagon, Room 3C553, Washington, DC 20301-3140, via e-mail at scott.dolgoff@osd.mil, or via phone at (703) 571-0082.

Due to scheduling difficulties, there is insufficient time to provide timely notice required by Section 10(a) of the Federal Advisory Committee Act and § 102-3.150(b) of the GSA Final Rule on Federal Advisory Committee Management, 41 CFR 102-3.150(b), which further requires publication at least 15 calendar days prior to the meeting.

Dated: April 6, 2006.

L.M. Bynum,

*OSD Federal Register Liaison Officer,
Department of Defense.*

BILLING CODE 5001-06-M

DEPARTMENT OF DEFENSE

Department of the Army; Corps of Engineers

Intent To Prepare a Joint Environmental Impact Statement/ Environmental Impact Report for the San Francisquito Creek Study, San Mateo and Santa Clara Counties, CA

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969 as implemented by the Council on Environmental Quality regulations (40 CFR parts 1500-1508), the California Environmental Quality Act (CEQA), and Public Law 102-484 section 2834, as amended by Public Law 104-106 section 2867, the Department of the Army and the San Francisquito Creek Joint Powers Authority (SFCJPA) hereby give notice of intent to prepare a joint Environmental Impact Statement/Environmental Impact Report (EIS/EIR) for the San Francisquito Creek Project in San Mateo and Santa Clara Counties, CA to consider opportunities to reduce both fluvial and tidal flooding, to reduce the threat to public safety due to flooding and to restore ecosystem quality and function, where possible. The U.S. Army Corps of Engineers (Corps) is the lead agency for this project under NEPA. The SFCJPA is the lead agency for this project under CEQA.

A public scoping meeting will be held to solicit comments on the environmental scope of the project and the appropriate scope of the joint EIS/EIR.

DATES: The public scoping meeting will be held on April 27, 2006 from 7 to 8:30 p.m. at the International School of the Peninsula, Cohn Campus, 151 Laura Lane, Palo Alto, Santa Clara County, CA. Written comments from all interested parties are encouraged and must be received on or before May 26, 2006.

ADDRESSES: Written comments and requests for information should be sent to Sarah Gaines, U.S. Army Corps of Engineers, San Francisco District, 333 Market St., 7th floor, San Francisco, CA 94105,

Sara.M.Gaines@spd02.usace.army.mil, (415) 977-8533.

FOR FURTHER INFORMATION CONTACT: For questions concerning the CEQA aspects of the study, contact Cynthia D'Agosta, San Francisquito Creek Joint Powers Authority, 701 Laurel Street, Menlo Park, CA 94025, (650) 330-6765.

SUPPLEMENTARY INFORMATION: The San Francisquito Creek watershed encompasses an area of approximately 45 square miles, extending from the ridge of the Santa Cruz Mountains to San Francisco Bay in California. The majority of the watershed lies in the Santa Cruz Mountains and Bay Foothills northwest of Palo Alto; the remaining 7.5 square miles lie on the San Francisquito alluvial fan near San Francisco Bay.

San Francisquito Creek watershed contains mainstem San Francisquito Creek and the main tributary streams of West Union Creek, Corte Madera Creek, Bear Creek and Los Trancos Creek. Los Trancos Creek and San Francisquito Creek form the boundary between San Mateo and Santa Clara counties. The reaches are divided up as follows: Reach 1 extends from San Francisco Bay to the upstream face of Highway 101; Reach 2 extends from Highway 101 to Highway 280; and Reach 3 continues from Highway 280 to the ridge of the Santa Cruz Mountains. Also under consideration are two additional reaches subject to tidal flooding. The tidal reaches are as follows: (1) Tidal Reach 1 begins near the railroad trestle south of the Dumbarton Bridge and extends to the Menlo Park City limits in San Mateo County; (2) Tidal Reach 2 is from Matadero Creek to Adobe Creek in Santa Clara County.

The non-Federal sponsor for the Feasibility phase of the study is the SFCJPA. The SFCJPA is comprised of the following member agencies: The City of Palo Alto; the City of Menlo Park; the City of East Palo Alto; the Santa Clara Valley Water District; and the San Mateo County Flood Control District, as well as the following associate members: Stanford University and the San Francisquito Watershed Council.

1. *Background.* The carrying capacity of San Francisquito Creek is affected by the presence of development, vegetation, sedimentation, land subsidence, levee settlement, erosion, and culverts and bridges in the project area. Tidal influence compounds the flooding problem in Reach 1, particularly during times of heavy rainfall and high tides. Erosion has caused the undermining of roads and structures in many places throughout
