

the Backfit Rule or address the regulatory criteria set forth in the applicable issue finality provision, as applicable, that would allow the staff to impose the position.

3. *The NRC staff has no intention to impose the SRP positions on existing nuclear power plant licensees either now or in the future (absent a voluntary request for a change from the licensee, holder of a regulatory approval or a design certification applicant).*

The staff does not intend to impose or apply the positions described in this final SRP section to existing (already issued) licenses (e.g., operating licenses and combined licenses) and regulatory approvals. Hence, the issuance of this SRP guidance—even if considered guidance subject to the Backfit Rule or the issue finality provisions in 10 CFR part 52—would not need to be evaluated as if it were a backfit or as being inconsistent with issue finality provisions. If, in the future, the NRC staff seeks to impose a position in the SRP on holders of already issued licenses in a manner that would constitute backfitting or does not provide issue finality as described in the applicable issue finality provision, then the staff must make a showing as set forth in the Backfit Rule or address the criteria set forth in the applicable issue finality provision, as applicable, that would allow the staff to impose the position.

SUPPLEMENTARY INFORMATION: Section 189a.(2)(A) grants the Commission the authority to issue and make immediately effective any amendment to an operating license or combined license, as applicable, upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of

a request for a hearing from any person. Section 189a.(2)(B) of the Atomic Energy Act of 1954, as amended, requires that the Commission periodically publish notice of any amendments issued, or proposed to be issued. To fulfill this requirement, the NRC issues a document entitled, “Biweekly Notice; Applications and Amendments to Facility Operating Licenses and Combined Licenses Involving No Significant Hazards Considerations,” in the **Federal Register**.

Instead of quoting each licensee's amendment application, the revised format will provide tables that state the proposed no significant hazards considerations determination and provide the location of the NRC's rationale for each determination in each of the listed applications. The revised format will also use tables to provide notice of license amendments issued. This streamlined format will provide efficiency to the public and stakeholders locating pertinent information and will be a government cost savings in time and print expenses. The public and stakeholders can still access all the information provided in each licensee's amendment application by going to the ADAMS accession numbers that will be provided in the tables.

Dated at Rockville, Maryland, this 22nd day of November, 2019.
