

or U.S. exporters of pork and pork products, small or otherwise, would be affected significantly by this proposed rule. This is because, for the reasons discussed above, the amount of live swine, pork, other pork products, and swine semen imported into the United States from the Mexican States of Sonora, Yucatan, Campeche, and Quintana Roo is likely to be small.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.
