**SUPPLEMENTARY INFORMATION:**

**I. Background**

On March 15, 2010 (75 FR 12168), EPA published a notice of proposed rulemaking (NPR) for the State of Delaware. The NPR proposed approval of the Delaware SIP revision that adds a new section (Section 2.0) to Regulation 1142—Control of Nitrogen Oxide Emissions from Industrial Boilers and Process Heaters at Petroleum Refineries in order to require new and/or additional controls on industrial boilers and process heaters with heat input capacities of equal to or greater than 200 million British thermal units per hour (mmBTU/hr). EPA received no comments on the NPR to approve Delaware's SIP revision. The formal SIP revision was submitted by the State of Delaware on November 17, 2009.

**II. Summary of SIP Revision**

Regulation 1142 (formerly SIP Regulation No. 42) establishes applicability and compliance dates to

any industrial boiler or process heater with a maximum heat input capacity of equal to or greater than 200 mmBTU/hr, which is operated or permitted to operate within a petroleum refinery facility (except for any Fluid Catalytic Cracking Unit carbon monoxide (CO) boiler). Regulation 1142 establishes NO<sub>x</sub> emission limitations for any industrial boiler or process heater with a maximum heat input capacity of equal to or greater than 200 mmBTU/hr, which is operated or permitted to operate within a petroleum refinery facility. The regulation also requires compliance with monitoring, recordkeeping, and reporting requirements.

**III. Final Action**

EPA is approving the Delaware SIP revision that adds a new section, Section 2—Control of Nitrogen Oxide Emissions from Industrial Boilers and Process Heaters at Petroleum Refineries to Delaware's Regulation 1142—Specific Emission Control Requirements for controlling NO<sub>x</sub> emissions from industrial boilers.

**IV. Statutory and Executive Order Reviews**

*A. General Requirements*

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not

impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a “significant regulatory action” subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

*B. Submission to Congress and the Comptroller General*

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

*C. Petitions for Judicial Review*

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by August 3, 2010. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and

shall not postpone the effectiveness of such rule or action.

This action, pertaining to the State of Delaware’s Regulation 1142—Specific Emission Control Requirements for controlling NOx emissions from industrial boilers, may not be challenged later in proceedings to enforce its requirements. (*See* section 307(b)(2).)

**ENVIRONMENTAL PROTECTION AGENCY****40 CFR Part 180****[EPA-HQ-OPP-2010-0033; FRL-8827-4]****2-Propenoic acid polymer, with 1,3-butadiene and ethenylbenzene; Tolerance Exemption****AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Final rule.

**SUMMARY:** This regulation establishes an exemption from the requirement of a tolerance for residues of 2-propenoic acid polymer, with 1,3-butadiene and ethenylbenzene, minimum number average molecular weight (in AMU) 9400 (CAS Reg. No. 25085-39-6); when used as an inert ingredient in a pesticide chemical formulation under 40 CFR 180.960. BASF Corporation submitted a petition to EPA under the Federal Food, Drug, and Cosmetic Act (FFDCA), requesting an exemption from the requirement of a tolerance. This regulation eliminates the need to establish a maximum permissible level for residues of 2-propenoic acid polymer, with 1,3-butadiene and ethenylbenzene on food or feed commodities.

**DATES:** This regulation is effective June 4, 2010. Objections and requests for hearings must be received on or before August 3, 2010, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

**II. Background and Statutory Findings**

In the **Federal Register** of March 19, 2010 (75 FR 13277) (FRL-8813-2), EPA issued a notice pursuant to section 408 of FFDCA, 21 U.S.C. 346a, announcing the receipt of a pesticide petition (PP 9E7649) filed by BASF Corporation, 100 Campus Drive, Florham Park, NJ 07932. The petition requested that 40 CFR 180.960 be amended by establishing an exemption from the requirement of a tolerance for residues of 2-propenoic acid polymer, with 1,3-butadiene and ethenylbenzene, minimum number average molecular weight (in AMU) 9400; CAS Reg. No. 25085-39-6. That notice included a summary of the petition prepared by the petitioner and solicited comments on the petitioner's request. The Agency did not receive any comments in the docket. However, the Agency did receive one comment by e-mail. The comment was received from a private citizen who opposed the authorization to sell any pesticide that leaves a residue on food. The Agency understands the commenter's concerns
