Advanced Hydropower, Inc.; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On May 6, 2014, Advanced Hydropower, Inc. filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of a hydropower project to be located on the Cullasaja River, on lands within the Nantahala National Forest, near the town of Highlands, in Macon County, North Carolina. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) A 50-foot-wide, 2-foot-high concrete diversion weir; (2) a 50-foot-wide, 2-foot-high coanda effect screened intake structure; (3) a 2,000-foot-long, 36-inch-diameter above ground penstock; (4) a 30-foot-high, 25-foot-long powerhouse containing one crossflow generating unit with a total capacity of 775 kilowatts; (5) a 40-foot-long, 40-foot-wide tailrace; (6) a 60-foot-long, 12.47 kilo-Volt transmission line. The project would have an estimated average annual generation of 3,300 megawatt-hours.

Background of Proposed Permit

EPA is proposing to reissue three draft NPDES general permits for the discharge of stormwater from small MS4s to certain waters within the commonwealth of Massachusetts. The three permits are:

MAR041000—Traditional cities and towns

MAR042000—Non-traditional state, federal, county and other publicly owned systems

MAR043000—Non-traditional transportation systems

While these are technically distinct permits, for convenience we have grouped them together in a single document and have provided a single fact sheet for all three of them, and this document refers to the draft general "permit" in the singular. The draft general permit, appendices, and fact sheet are available at: http://www.epa.gov/region1/npdes/stormwater/MS4_MA.html.

The conditions in the draft permit are established pursuant to Clean Water Act (CWA) section 402(p)(3)(iii) to ensure that pollutant discharges from small MS4s are reduced to the Maximum Extent Practicable (MEP), protect water quality, and satisfy the appropriate requirements of the CWA.
