BILLING CODE 4120-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Proposed Data Collection; Comment Request; National Survey of Primary Care Physicians' Recommendations and Practice for Breast, Cervical, Colorectal, and Lung Cancer Screening

SUMMARY: In compliance with the
provisions of Section 3506(c)(2)(A) of

the Paperwork Reduction Act of 1995,
for opportunity for public comments on
proposed data collection projects, the
National Institutes of Health (NIH),
National Cancer Institute (NCI) will
publish periodic summaries of proposed
projects to be submitted to the Office of
Management and Budget (OMB) for
review and approval.

Proposed Collection: Title: National
Survey of Primary Care Physicians'
Recommendations and Practice for
Breast, Cervical, Colorectal, and Lung
Cancer Screening. *Type of Information
Collection Request:* New. *Need and Use
of Information Collection:* This study
will obtain current, national data on
primary care physicians' knowledge,
attitudes, recommendations, and
practices related to screening for breast,
cervical, colorectal, and lung cancer.
There have been substantial changes in

guidelines and/or technologies for these
types of cancer screening in recent
years. The data collected in this study
will support and further NCI work in
monitoring and evaluating providers'
cancer control knowledge, attitudes, and
practices and their impact on
population health, as well as enable
monitoring of progress toward major
cancer control goals. Two
questionnaires, one covering breast and
cervical cancer screening and the other
colorectal and lung cancer screening,
will be administered by mail or
telephone to a randomly-selected
national sample of primary care
physicians. *Frequency of Response:* One
Time. *Affected Public:* Medical
practices, clinics, or other health care
organizations. *Type of Respondents:*
Primary Care Physicians. *Burden
estimates* are as follows:

Questionnaire	Estimated number of respondents	Estimated number of responses per respondent	Average burden hours per response	Estimated total annual burden hours
Breast and cervical cancer screening	1250	1	0.333	416.25
Colorectal and lung cancer screening	1250	1	0.333	416.25
Total				832.5

There are no Capital Costs to report.
There are no Operating or Maintenance
Costs to report.

Request for Comments: Written
comments and/or suggestions from the
public and affected agencies are invited
on one or more of the following points:
(a) Whether the proposed collection of
information is necessary for the
performance of the functions of the
agency, including whether the
information shall have practical utility;
(b) the accuracy of the agency's estimate
of the burden of the proposed collection
of information; (c) ways to enhance the
quality, utility, and clarity of the
information to be collected; and (d)
ways to minimize the burden of the
collection of information on
respondents, including through the use
of automated collection techniques or
other forms of information technology.

FOR FURTHER INFORMATION CONTACT:

Send comments to Carrie N. Klabunde,
Ph.D., Epidemiologist, Division of
Cancer Control and Population
Sciences, National Cancer Institute,
Executive Plaza North 4005, 6130
Executive Boulevard, Bethesda,
Maryland 20892-7344 or call non-toll-
free (301) 402-3362 or E-mail:
klabundc@mail.nih.gov.

Comments Due Date: Comments
regarding this information collection are
best assured of having their full effect if

received within 60 days of the date of
this publication.

Dated: January 11, 2006.

Rachelle Ragland-Greene,

NCI Project Clearance Liaison, National
Institutes of Health.

BILLING CODE 4101-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health/National Institute of Environmental Health Sciences

Laboratory of Pulmonary Pathobiology; Submission for OMB Review; Comment Request; Use of In- Home Test Kits in Dust Mite Allergen Reduction

SUMMARY: Under the provisions of
Section 3507(a)(1)(D) of the Paperwork
Reduction Act of 1995, the National
Institute of Environmental Health
Sciences (NIEHS), the National
Institutes of Health (NIH) has submitted
to the Office of Management and Budget
(OMB) a request to review and approve
the information collection listed below.
This proposed information collection
was previously published in the **Federal
Register** on October 21, 2004, pages

61853-61854, and allowed 60 days for
public comment. No public comments
were received although one person sent
an e-mail expressing interest in the
study and asking if she could
participate. She was told this was a pilot
study to be carried out in a specific
location in North Carolina. The purpose
of this notice is to allow an additional
30 days for public comment. The
National Institutes of Health may not
conduct or sponsor, and the respondent
is not required to respond to, an
information collection that has been
extended, revised, or implemented on or
after October 1, 1995, unless it displays
a currently valid OMB control number.

Proposed Collection: Title: Use of In-
home Test Kits in Dust Mite Allergen
Reduction. *Type of Information
Collection Request:* New. *Need and Use
of Information Collection:* This request
for OMB review and approval of the
information collection is required by
regulation 42 CFR part 65(a)(6).
Asthmatics and others with dust mite
allergies often implement strategies to
avoid dust mite exposure, but have little
objective evidence that their
interventions are successful in reducing
dust mite populations. Recently
developed in-home test kits have
introduced the capability to monitor the
effectiveness of allergen reduction
strategies by providing an affordable,
