Synopsis of Notice of Inquiry

1. Section 628(g) of the Communications Act of 1934, as amended, directs the Commission to report annually to Congress on the status of competition in the market for the delivery of video programming. This *Notice of Inquiry (NOI)* solicits data and information on the status of competition in the market for the delivery of video programming for our eleventh annual report (2004 Report). We request information, comments, and analyses that will allow us to compare video delivery technologies and to evaluate the status of competition on the industry groups involved and on consumers.

2. Comments submitted in this proceeding will be augmented with information from publicly available sources. We emphasize the importance of the information provided by industry participants with the best knowledge of the questions and issues raised. If we continue to find that we do not get the necessary data from industry participants, we may pursue options for a mandatory data collection process to ensure that we have appropriate information to fulfill our statutory mandate to provide Congress with an annual assessment of the status of competition in the video marketplace. The accuracy and the usefulness of the 2004 Report are directly related to the information we receive from commenters.

3. The Commission will report on the current state of competition and report on changes in the competitive environment since our 2004 Report. To the extent feasible, we request data as of June 30, 2004, to facilitate our analysis of competitive trends over time.

Video programming is also distributed on videocassettes and DVDs through retail distribution outlets and over the Internet.

5. We seek information and statistical data for each type of video programming distributor including: The number of homes capable to receiving service via each wired (e.g., an incumbent cable system, BSP, OVS provider) or wireless technology (e.g., DBS, wireless cable, PCO); the number of subscribers and penetration rates to different levels of service for each service (e.g., basic cable service, cable programming service tier or "CPST," premium, pay-per-view, video-on-demand); channel capacities and the number, type, and identity of video programming channels offered, prices charged for various programming packages; cost of programming inputs; industry and individual firm financial information, such as total revenue and revenue by individual company segments or services, cash flow, and expenditures; information on how video programming distributors compare in terms of relative size and financial
