SUPPLEMENTARY INFORMATION:

Background

Restoring an endangered or threatened animal or plant species to the point where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the Service's endangered species program. To help guide the recovery effort, the Service prepares recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of species, establish criteria for the recovery levels for downlisting or delisting them, and estimate time and cost for implementing the recovery measures needed.

In a recent court decision (Civil Action No. 99-927 [ESH]), the judge ruled that the 1998 Final Sonoran Pronghorn Recovery Plan “* * * fails to establish (1) objective measurable criteria which, when met, would result in a determination that the pronghorn may be removed from the list of endangered species or, if such criteria are not practicable, an explanation of that conclusion and (2) estimates of the time required to carry out those measures needed to achieve the plan's goal and to achieve intermediate steps toward that goal where practicable, or, if such estimates are not practicable, an explanation of that conclusion.” The Court has ordered the Service to reconsider these portions of the 1998 Final Sonoran Pronghorn Recovery Plan. Deadline for completion of this task is November 30, 2001.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 *et seq.*), requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that public notice and an opportunity for public review and

comment be provided during recovery plan development. Public review and comment is also sought for this supplement and amendment to an existing recovery plan. The Service will consider all information presented during a public comment period prior to approval of the supplement and amendment to the 1998 Final Sonoran Pronghorn Recovery Plan. The Service and other Federal agencies will also take these comments into account in the course of implementing recovery activities.

The Draft Supplement and Amendment to the 1998 Final Sonoran Pronghorn Recovery Plan updates selected biological sections of the Recovery Plan, addresses the five listing factors mandated by Section 4(a)(1) of the Endangered Species Act of 1973, reassesses recovery criteria presented in the Final Recovery Plan, and where practicable, provides estimates of time necessary to carry out measures needed to effect recovery of Sonoran pronghorn as articulated in the Final Recovery Plan. The Draft Supplement and Amendment to the 1998 Final Recovery Plan was developed by the Service in coordination with an appointed Recovery Team that includes a group of scientists and agency biologists with expertise in the ecology of the Sonoran pronghorn. The Draft Supplement and Amendment to the Recovery Plan has undergone peer review by scientists, conservation biologists, range experts, and others experienced in reviewing recovery plans. This Draft Supplement and Amendment to the Recovery Plan incorporates their comments where applicable.

Public Comments Solicited

We solicit written comments on the Draft Supplement and Amendment to the 1998 Final Sonoran Pronghorn Recovery Plan. All comments received by the date specified above will be considered prior to approval of the plan.

The authority for this action is Section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).
