The proposed ESRD PPS would also replace the current basic case-mix adjusted composite payment system and the methodologies for the reimbursement of separately billable outpatient ESRD services. The comment period for the proposed rule, which would have ended on November 16, 2009, is extended for 30 days.

**DATES:** *Effective Date:* The comment period is extended to 5 p.m. on December 16, 2009.

**SUPPLEMENTARY INFORMATION:** On September 29, 2009, we published a proposed rule in the **Federal Register** (74 FR 49922 through 50102) that would implement a case-mix adjusted bundled PPS for Medicare outpatient ESRD dialysis facilities beginning January 1, 2011, in compliance with the statutory requirement of the Medicare Improvements for Patients and Providers Act (MIPPA), enacted July 15, 2008. The proposed ESRD PPS would replace the current basic case-mix adjusted composite payment system and the methodologies for the reimbursement of separately billable outpatient ESRD services.

The proposed rule, "Medicare Program; End-Stage Renal Disease Prospective Payment System," is significant in that it proposes a completely new payment system for outpatient ESRD services. Due to the complexity and scope of the September 29, 2009 proposed rule, we believe additional time is necessary for the public to examine the proposed rule and to provide meaningful comments on its provisions. Therefore, we have decided to extend the comment period for an additional 30 days. This document announces the extension of the public comment period to December 16, 2009.

#### Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Season and Retention Limit Adjustments

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Proposed rule; request for comments; notice of public hearings.

**SUMMARY:** NMFS proposes to adjust the Atlantic bluefin tuna (BFT) fishery regulations to increase the General category maximum daily retention limit, allow the General category season to remain open until the January subquota is reached, and increase the Harpoon category daily incidental retention limit. The intent of this proposed rule is to enable more thorough utilization of the available U.S. BFT quota, while ending BFT overfishing, rebuilding the BFT stock by 2019, and minimizing bycatch and bycatch mortality to the extent practicable. NMFS solicits written comments and will hold public hearings to receive oral comments on these proposed actions.

**DATES:** Written comments must be received on or before December 21, 2009.

The public hearing dates are:

1. December 14, 2009, 3 p.m. to 5 p.m., Silver Spring, MD.
2. December 15, 2009, 3 p.m. to 5 p.m., Gloucester, MA.

**FOR FURTHER INFORMATION CONTACT:** Sarah McLaughlin, 978–281–9260.

**SUPPLEMENTARY INFORMATION:** Atlantic tunas are managed under the dual authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) and the Atlantic Tunas Convention Act (ATCA). ATCA authorizes the Secretary of Commerce (Secretary) to promulgate regulations, as may be necessary and appropriate, to implement recommendations of the International Commission for the Conservation of Atlantic Tunas (ICCAT). The authority to issue regulations under the Magnuson-Stevens Act and ATCA has been delegated from the Secretary to the Assistant Administrator for Fisheries, NOAA (AA).

#### I. Background

On October 2, 2006, NMFS published in the **Federal Register** (71 FR 58058) final regulations, effective November 1, 2006, implementing the Consolidated Atlantic Highly Migratory Species Fishery Management Plan (Consolidated HMS FMP), which consolidated

management of all Atlantic HMS (i.e., sharks, swordfish, tunas, and billfish) into one comprehensive FMP. The implementing regulations for Atlantic HMS are at 50 CFR part 635.

In recent years, U.S. BFT landings have fallen below their respective ICCAT-recommended quotas. Factors that may have played a role in the underharvest of the domestic BFT fishery since 2004 include reduced availability of BFT for harvest, possibly due to recent changes in BFT regional availability and/or a reduced BFT population level, and reduced effort due to operational expenses (such as fuel costs). While the recreational Angling category and the commercial Longline category have been able to fill their subquotas in recent years, the commercial handgear categories (General and Harpoon) have not. In 2008, approximately 48 percent of the baseline and 31 percent of the adjusted General category quota was landed, and approximately 56 percent of the baseline and 36 percent of the adjusted Harpoon category quota was landed.

At its 2008 meeting, ICCAT recommended a reduction in the western Atlantic BFT Total Allowable Catch (TAC), set to allow for rebuilding of the stock through 2018, from 2,100 mt to 1,900 mt for 2009 and 1,800 mt for 2010. The baseline U.S. quotas for 2009 and 2010, respectively, are 1,009.9 and 952.4 mt, not including the annual allocation of 25 mt to account for incidental catch of BFT by pelagic longline vessels fishing in the Northeast Distant Area. Under the Consolidated HMS FMP, the General and Harpoon categories are allocated 47.1 and 3.9 percent, respectively, of the annual baseline BFT quota. For 2009, the General and Harpoon categories received base quotas of 475.7 mt and 39.4 mt, respectively, and adjusted quotas of 623.1 mt and 51.6 mt, respectively (74 FR 26110, June 1, 2009).

Over the last year, NMFS has received comments suggesting changes that could increase domestic BFT landings within existing quotas and subquotas. NMFS received these suggestions at the HMS Advisory Panel meetings in 2008 and 2009, during the 2009 BFT quota specifications public hearings, and in recent constituent and congressional correspondence. In response to these suggestions and related ones regarding the Atlantic swordfish fishery, NMFS published an Advance Notice of Proposed Rulemaking (ANPR) (74 FR 26174, June 1, 2009), requesting specific comment on potential regulatory changes that would potentially increase fishing opportunities in the BFT and
