

eCommerce PIN debit payment transactions in 2012, including the number and value of transactions by transaction dollar amount.

i. *Mobile Wallet Processor Survey*: Processors would report the number and value of mobile wallet transactions in 2012, including the number and value of transactions by transaction dollar amount.

The Board specifically requests comment on which entities should receive the Mobile Wallet Processor Survey, and what range of products should be included.

Check Sample Survey (FR 3066c):

The FR 3066c would conduct a survey that in past FRPS surveys was referred to as the Check Sample Study (CSS). This survey would collect data on individual checks paid in 2012. Versions of the CSS were conducted in three out of four FRPS, including the first and last. The survey instrument design could be modified slightly, but is expected to be very similar to the instrument used in 2010. More importantly, the data collection method may be revised based on proposals received through a competitive bidding process. Past approaches included the collection of individual check information on multiple survey forms provided by a stratified sample of about 150 depository institutions and the use of survey forms by personnel employed by a contractor using images retrieved from a single institution that aggregated data from about 11 very large institutions. The decision on what approach to use for this survey will be based on an evaluation of the proposals received. Depository institutions would not be asked to complete the survey instrument.

The Board specifically requests comment on the following:

- i. The most effective methods of selecting a random sample of check images from within depository institutions.
- ii. The most valuable and feasible information to collect from the checks.

Retail Payments Survey Supplement (FR 3066d)

The FR 3066d data may be collected from networks, processors, and issuers in order to update the volume of major electronic payment instruments such as credit cards and prepaid cards, and emerging payment instruments. The surveys may include parts of the FR 3066a and b, or may involve new sections if new payment system developments emerge.
