

Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226).

East Coast Observers, Inc. will conduct sea turtle abundance and relocation trawls in conjunction with U.S. Army Corps of Engineers (Corps) dredging projects in waters of the Atlantic coast. Up to 350 loggerhead, 150 green, 150 Kemp's ridley, 10 hawksbill, and 10 leatherback sea turtles, and 10 shortnose sturgeon will be captured. Collected sea turtles will be handled, measured, flipper and passive integrated transponder (PIT) tagged, temporarily marked with a non-toxic marker, and released at a relocation site approximately three to five miles away from the dredge project. A single tissue sample may be taken from each individual turtle for genetic analysis. Collected shortnose sturgeon will be captured, handled have a barbel clip taken, and relocated to a safe area. The permit authorizes a total of up to 5 sea turtle (loggerhead, green, Kemp's ridley, and hawksbill in combination) incidental mortalities over the course of the permit. The permit is issued for five years.

Issuance of this permit, as required by the ESA, was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of any endangered or threatened species, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.
