Procedural Background

This rule is limited to the changes contained in Amendment No. 10 to CoC No. 1004 and does not include other aspects of the Standardized NUHOMS® System design. Because NRC considers this action noncontroversial and routine, the NRC is publishing this proposed rule concurrently as a direct final rule in the Rules and Regulations section of this **Federal Register**.

Adequate protection of public health and safety continues to be ensured. The direct final rule will become effective on August 24, 2009. However, if the NRC receives significant adverse comments on the direct final rule by July 10, 2009, then the NRC will publish a document that withdraws the direct final rule. If the direct final rule is withdrawn, the NRC will address the comments received in response to the proposed revisions in a subsequent final rule. Absent significant modifications to the proposed revisions requiring republication, the NRC will not initiate a second comment period on this action.
