

performing an acceptance review of ERs submitted as part of a license renewal application.

Background and Discussion

The NRC staff routinely reviews ERs against the requirements of 10 CFR 51.45 and 10 CFR 51.53(c) as part of the acceptance review of reactor license renewal applications. Staff review guidance governing reactor license renewal environmental reviews and the preparation of environmental impact statements is provided in NUREG-1555, Standard Review Plans for Environmental Reviews for Nuclear Power Plants, Supplement 1: Operating License Renewal.

In conducting its acceptance review, the staff also relies on the guidance provided to applicants in Regulatory Guide 4.2, Supplement 1, Preparation of Supplemental Environmental Reports for Applications to Renew Nuclear Power Plant Operating Licenses. The regulatory guide provides methods acceptable to the staff for implementing the provisions of 10 CFR 51.45 and 10 CFR 51.53(c). While conformance with the suggested format of the regulatory guide is not required, use of the guide is expected to ensure the completeness of the information provided, assist the NRC staff and others in locating information, and result in more efficient and timely NRC staff review.

Proposed Action

The acceptance review checklist for ERs submitted with license renewal applications, available via ADAMS at Accession No. ML063190452, will be incorporated into the next revision of NUREG-1555, Supplement 1. The acceptance checklist is intended to be a tool to ensure efficiency and consistency in the staff's acceptance reviews and ensure that all necessary components of license renewal stage ERs are submitted in accordance with governing regulations. As noted in the checklist instructions, the absence of any of the information recommended in Regulatory Guide 4.2, Supplement 1, would not require that supplemental information be provided prior to acceptance of an application; however, applicants should expect that the absence of such information may result in more intensive environmental audit activities and/or issuance of early requests for additional information to support the staff's review. The docketing and subsequent finding of a timely and sufficient application (including the ER) does not preclude NRC reviewers from requesting additional information as a review proceeds, nor does it predict the NRC's

final determination regarding the approval or denial of a license renewal application. This proposed LR-ISG is not intended to substitute or re-interpret requirements outlined in 10 CFR 51.45 and 10 CFR 51.53(c). The checklist is also expected to serve as a knowledge management tool for NRC staff members by specifying review criteria in a simplified, user-friendly format.
