SUPPLEMENTARY INFORMATION:

I. Background

DoD is establishing the “DoD Claims Management Records,” DoD–0016, as a DoD-wide Privacy Act system of records. A DoD-wide system of records notice (SORN) supports multiple DoD paper or electronic recordkeeping systems operated by more than one DoD component that maintain the same kind of information about individuals for the same purpose. Establishment of DoD-

wide SORNs helps the DoD standardize the rules governing the collection, maintenance, use, and sharing of personal information in key areas across the enterprise. DoD-wide SORNs also reduce duplicative and overlapping SORNs published by separate DoD components. The creation of DoD-wide SORNs is expected to make locating relevant SORNs easier for DoD personnel and the public and create efficiencies in the operation of the DoD privacy program.

The purpose of this SORN is to manage records collected, maintained, and disseminated by a DoD Component for addressing personnel and general claims both for and against the Department. This system of records covers all stages in the claims process to include notification, investigation, adjudication, negotiation, and resolution. These records may include information about claimants and their attorneys or representatives; including those with an affiliation to the DoD such as uniformed service personnel and their family members, civilian personnel, and contractors. The records may also include members of the public who have a physical or legal affiliation with the DoD and information about other persons with information pertinent to the claims adjudication process, such as witnesses, or state and local government officials.

DoD SORNs have been published in the **Federal Register** and are available from the address in **FOR FURTHER INFORMATION CONTACT** or at the Privacy, Civil Liberties, and FOIA Directorate website at <https://dpcl.d.defense.gov>.

II. Privacy Act

Under the Privacy Act, a “system of records” is a group of records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined as a U.S. citizen or lawful permanent resident.

In accordance with 5 U.S.C. 552a(r) and Office of Management and Budget (OMB) Circular No. A–108, the DoD has provided a report of this system of records to the OMB and to Congress.

Title of Collection: Evaluation of the REL West Supporting Early Reading Comprehension through Teacher Study Groups Toolkit.*OMB Control Number:* 1850-NEW.*Type of Review:* New ICR.*Respondents/Affected Public:*

Individuals or Households.

Total Estimated Number of Annual Responses: 6,012.*Total Estimated Number of Annual Burden Hours:* 1,255.*Abstract:* The current authorization for the Regional Educational Laboratories (REL) program is under the Education Sciences Reform Act of 2002, Part D, Section 174, (20 U.S.C. 9564), administered by the Department of Education, Institute of Education Sciences (IES), National Center for Education Evaluation and Regional Assistance (NCEE). The central mission and primary function of the RELs is to support applied research and provide technical assistance to state and local education agencies within their region (ESRA, Part D, section 174(f)). The REL program's goal is to partner with educators and policymakers to conduct work that is change-oriented and supports meaningful local, regional, or state decisions about education policies, programs, and practices to improve outcomes for students.

Elementary-grade students in U.S. public schools continue to struggle with reading comprehension, with only 35 percent of 4th-grade students performing at or above proficient on the National Assessment of Educational Progress (NAEP) scores in reading (Hussar et al., 2020). To address this problem in earlier grades, when schools begin reading comprehension instruction, REL West is developing a toolkit to support teachers in implementing evidence-based instructional strategies to improve reading comprehension among students in grades K-3. The toolkit is based on the Improving Reading Comprehension in Kindergarten Through 3rd Grade IES practice guide (Shanahan et al., 2010) and is being developed in collaboration with state and district partners in Arizona. The toolkit contains the following three parts: (1) Initial Diagnostic and On-going Monitoring Instruments, (2) Professional Development Resources, and (3) Steps

for Institutionalizing Supports for Evidence-Based Practice.

This study is designed to measure the efficacy and implementation of the REL West-developed toolkit designed to improve reading comprehension among students in grades K-3. The toolkit evaluation team plans to conduct an independent evaluation using a school-level, cluster randomized controlled trial design to assess the efficacy and cost-effectiveness of the school-based professional development resources included in the toolkit. The evaluation will take place in 70 schools across six districts in Arizona and focus on K-3 reading comprehension for all students. The evaluation will also assess how teachers and facilitators implement the toolkit to provide context for the efficacy findings and guidance to improve the toolkit and its future use. The toolkit evaluation will produce a report for district and school leaders who are considering strategies to improve reading comprehension in kindergarten through 3rd grade. The report will be designed to help district and school leaders decide whether and how to use the toolkit to help them implement the practice guide recommendations.
