

preference standard (e.g., 60–70 percent) that applies to all products and materials involved in TOD projects. They argued that this would simplify the compliance process by preventing the need for sponsors to request many individual product waivers, thereby reducing the burden on DOT resources and expediting the advancement of TOD Housing Projects. As was described in the notice, to support both the delivery of housing and domestic manufacturing, DOT will continue to work closely with borrowers to better understand and document the sources of materials and products used in TOD Housing Projects and the challenges that compliance with DOT's domestic preference standards present and determine appropriate solutions.

One commenter requested that DOT update its guidance for TOD projects to include a “plain language” list of examples of manufactured products covered by this waiver. As was described in the notice, DOT recently provided guidance on Federal requirements applicable to TOD projects receiving TIFIA or RRIF credit assistance. DOT appreciates the suggestion and will consider it in determining the best ways of providing technical assistance to borrowers for TOD Housing Projects.

Finding on the Waiver

Based on the information available, DOT is issuing a public interest waiver of the Buy America requirements for manufactured products that apply to Bureau-financed TOD Housing Projects. This waiver is limited to TOD Housing Projects that enter into creditworthiness review on or before December 31, 2025. For these projects, DOT will continue to apply domestic steel, iron, and construction materials content requirements.

To ensure transparency and maintain consistency in the application of Buy America standards for all recipients (one rule for all projects and borrowers), this waiver will apply to both TOD Housing Projects with for-profit borrowers and those with non-Federal entity borrowers.

To continue to support the goals of Buy America policies, DOT will work closely with TOD Housing Project borrowers to better understand and document the sources of materials and products used in such projects. This research will assist DOT in refining its domestic preference requirements policy for TOD projects entering the Bureau's creditworthiness review phase after January 1, 2026, and to further support both the delivery of housing and domestic manufacturing.

DEPARTMENT OF TRANSPORTATION

Bureau of Transportation Statistics

[Docket ID Number DOT–OST–2014–0031]

Agency Information Collection; Activity Under OMB Review; Report of Financial and Operating Statistics for Small Aircraft Operators

AGENCY: Bureau of Transportation Statistics (BTS), DOT.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the Bureau of Transportation Statistics invites the general public, industry and other governmental parties to comment on the continuing need for and usefulness of BTS collecting financial, traffic and operating statistics from small certificated and commuter air carriers. Small, certificated air carriers (operate aircraft with 60 seats or less or with 18,000 pounds of payload capacity or less) currently must file the two quarterly schedules: F–1 “Report of Financial Data”; F–2 “Report of Aircraft Operating Expenses and Related Statistics”; and Commuter air carriers must file the Schedule F–1 “Report of Financial Data”. Commenters should address whether BTS accurately estimated the reporting burden and if there are other ways to enhance the quality, utility, and clarity of the information collected.

DATES: Written comments should be submitted by February 18, 2025.

ADDRESSES: You may submit comments identified by DOT Docket ID Number DOT–OST–2014–0031 by any of the following methods:

OMB Approval No. 2138–0009

Title: Report of Financial and Operating Statistics for Small Aircraft Operators

Form No.: BTS Form 298–C.

Type Of Review: Extension of a currently approved collection for the financial data.

Respondents: Small certificated (28) and commuter air carriers (33).

Schedule F1:

Number of Respondents: 61.

Number of Annual responses: 244.

Total Burden per Response: 4 hours.

Total Annual Burden: 976 hours.

Schedule F2:

Number of Respondents: 28.

Number of Annual responses: 112.

Total Burden per Response: 12 hours.

Total Annual Burden: 1,344 hours.

Needs and Uses: Program uses for Form 298–C financial data are as follows:

Mail Rates

The Department of Transportation sets and updates the Intra-Alaska Bush mail rates based on carrier aircraft operating expense, traffic, and operational data. Form 298–C cost data, especially fuel costs, terminal expenses, and line haul expenses are used in arriving at rate levels. DOT revises the established rates based on the percentage of unit cost changes in the carriers' operations. These updating procedures have resulted in the carrier's receiving rates of compensation that more closely parallel their costs of providing mail service and contribute to the carriers' economic well-being.

Essential Air Service

DOT often has to select a carrier to provide a community's essential air service. The selection criteria include historic presence in the community, reliability of service, financial stability and cost structure of the air carrier.

Carrier Fitness

Fitness determinations are made for both new entrants and established U.S.

domestic carriers proposing a substantial change in operations. A portion of these applications consists of an operating plan for the first year (14 CFR part 204) and an associated projection of revenues and expenses. The carrier's operating costs, included in these projections, are compared against the cost data in Form 298–C for a carrier or carriers with the same aircraft type and similar operating characteristics. Such a review validates the reasonableness of the carrier's operating plan.

The quarterly financial submissions by commuter and small certificated air carriers are used in determining each carrier's continuing fitness to operate. Section 41738 of title 49 of the United States Code (U.S.C.) requires DOT to find all commuter and small certificated air carriers fit, willing, and able to conduct passenger service as a prerequisite to providing such service to an eligible essential air service point. In making a fitness determination, DOT reviews three areas of a carrier's operation: (1) the qualifications of its management team, (2) its disposition to comply with laws and regulations, and (3) its financial posture. DOT must determine whether or not a carrier has sufficient financial resources to conduct its operations without imposing undue risk on the traveling public. Moreover, once a carrier begins conducting flight operations, DOT is required to monitor its continuing fitness.

Senior DOT officials must be kept fully informed and advised of all current and developing economic issues affecting the airline industry. In preparing financial condition reports or status reports on a particular airline, financial and traffic data are analyzed. Briefing papers prepared for senior DOT officials may use the same information.

The Confidential Information Protection and Statistical Efficiency Act of 2002 (44 U.S.C. 3501 note), requires a statistical agency to clearly identify information it collects for non-statistical purposes. BTS hereby notifies the respondents and the public that BTS uses the information it collects under this OMB approval for non-statistical purposes including, but not limited to, publication of both Respondent's identity and its data, submission of the information to agencies outside BTS for review, analysis and possible use in regulatory and other administrative matters.

Issued in Washington, DC, January 8, 2025.

Rolf Schmitt,

Acting Director, Office of Airline Information, Bureau of Transportation Statistics.
