NUCLEAR REGULATORY COMMISSION

[Docket No. 030–11209; NRC–2009–0061]

Notice of Availability of Environmental Assessment and Finding of No Significant Impact for Amendment of Byproduct Materials License No. 21–16544–01, for Unrestricted Release of a Facility in Ann Arbor, MI

AGENCY: Nuclear Regulatory Commission.

ACTION: Issuance of Environmental Assessment and Finding of No Significant Impact for License Amendment.

FOR FURTHER INFORMATION CONTACT:

Peter J. Lee, Ph.D., CHP, Health Physicist, Materials Control, ISFSI, and Decommissioning Branch, Division of Nuclear Materials Safety, Region III, U.S. Nuclear Regulatory Commission, 2443 Warrenville Road, Lisle, Illinois 60532; telephone: (630) 829–9870; fax number: (630) 515–1259; or by e-mail at pjl2@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is proposing to amend Byproduct Materials License No. 21–16544–01. This license is held by the Department of Commerce (the Licensee) for its Lake Michigan Field Station, Research Vessel Shenehon, located at 1431 Beach Street, Muskegon, Michigan (the Facility). Issuance of the amendment would authorize release of the Facility for unrestricted use. The Licensee requested this action in letter dated November 24, 2008. The NRC has prepared an Environmental Assessment (EA) in support of this proposed action in accordance with the requirements of Title 10, Code of Federal Regulations (CFR), Part 51 (10 CFR Part 51). Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate with respect to the proposed action. The amendment will be issued to the Licensee following the publication of this FONSI and EA in the **Federal Register**.

II. Environmental Assessment

Identification of Proposed Action

The proposed action would approve the Licensee's November 24, 2008, license amendment request, resulting in the release of the Facility for unrestricted use. License No. 21–16544–01 was issued on July 8, 1975, pursuant to 10 CFR Part 30, and has been amended periodically since that time. The license authorizes the use of by-product materials for in-vitro laboratory research studies and neutron activation studies on soil samples. The licensee ceased using licensed materials in the Facility in 2008. The Licensee has conducted final status surveys of the Facility. The results of these surveys along with other supporting information were provided to the NRC to demonstrate that the criteria in Subpart E of 10 CFR part 20 for unrestricted release have been met.

Need for the Proposed Action

The Licensee has ceased conducting licensed activities at the Facility and seeks the unrestricted use of its Facility.

Environmental Impacts of the Proposed Action

The historical review of licensed activities conducted at the Facility shows that such activities involved use of hydrogen-3 and carbon-14. Prior to performing the final status survey, the Licensee conducted decontamination activities, as necessary, in the areas of the Facility affected by these radionuclides.

The Licensee completed final status surveys on the Facility on November 14, 2008. The surveys covered all areas of the Facility. The final status survey report was attached to the Licensee's amendment request dated November 24, 2008. The Licensee elected to demonstrate compliance with the radiological criteria for unrestricted release as specified in 10 CFR 20.1402 by using the screening values described in NUREG–1757, "Consolidated Decommissioning Guidance," Volume 2 as the radionuclide-specific derived concentration guideline levels (DCGLs). These values provide acceptable levels of surface contamination to demonstrate compliance with the NRC requirements in Subpart E of 10 CFR Part 20 for unrestricted release. The Licensee's final status survey results were below these values and are in compliance with the As Low As Reasonably Achievable (ALARA) requirement of 10 CFR 20.1402. The NRC thus finds that the Licensee's final status survey results are acceptable.
