

uses RLF supplemental funds for remediation activities at a public building or to carry out a public work, the Buy American provisions of the Recovery Act apply. For example, if a private sector developer were to use an RLF loan to install a cap at a public building, the Buy American provisions of the Recovery Act would apply. Similarly, if a non-profit RLF subgrantee were to construct an alternate drinking water system connected to a public system as part of a remedial action at a brownfield site, the Buy American provisions of the Recovery Act would apply to the loan or subgrant. There may be other situations in which the Buy American provisions apply to the use of RLF supplemental funds by non-governmental borrowers and subgrantees for remediation activities at public buildings or public works as well.

Statutory and Executive Order Reviews: Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a “significant regulatory action” and is therefore not subject to OMB review. Because this grant action is not subject to notice and comment requirements under the Administrative Procedures Act or any other statute, it is not subject to the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) or sections 202 and 205 of the Unfunded Mandates Reform Act of 1999 (UMRA) (Pub. L. 104–4). In addition, this action does not significantly or uniquely affect small governments. Although this action does not generally create new binding legal requirements, where it does, such requirements do not substantially and directly affect Tribes under Executive Order 13175 (63 FR 67249, November 9, 2000). Although this grant action does not have significant Federalism implications under Executive Order 13132 (64 FR 43255, August 10, 1999), EPA consulted with states in the development of these grant guidelines. This action is not subject to Executive Order 13211, “Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use” (66 FR 28355, May 22, 2001), because it is not a significant regulatory action under Executive Order 12866. This action does not involve technical standards; thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This action does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). The Congressional Review Act (5 U.S.C. 801 *et seq.*) generally provides that before certain

actions may take effect, the agency promulgating the action must submit a report, which includes a copy of the action, to each House of the Congress and to the Comptroller General of the United States. Since this grant action, when finalized, will contain legally binding requirements, it is subject to the Congressional Review Act, and EPA will submit its final action in its report to Congress under the Act.

Proposed Reissuance of a General NPDES Permit for Facilities Related to Oil and Gas Extraction—Permit Number AKG-33-0000

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed reissuance of a general permit.

SUMMARY: On January 2, 2009, the general permit (GP) regulating activities related to the extraction of oil and gas

on the North Slope of the Brooks Range in the state of Alaska expired. This proposed reissuance of a general permit is intended to regulate activities related to the extraction of oil and gas on the North Slope of the Brooks Range in the state of Alaska plus the proposed area expansion described in the Fact Sheet. The proposed general permit would cover the same discharges as the previous general permit except for the domestic wastewater discharges. The covered discharges include gravel pit dewatering, construction dewatering, hydrostatic test water, mobile spill response, and storm water from industrial activities. The proposed reissuance also includes a new outfall designation for the discharge of secondary containment water. When issued, the proposed permit will establish effluent limitations, standards, prohibitions and other conditions on discharges from covered facilities. These conditions are based on existing national effluent guidelines, the state of Alaska's Water Quality Standards and material contained in the administrative record. A description of the basis for the conditions and requirements of the proposed general permit is given in the Fact Sheet. This is also notice of the draft Section 401 Certification provided by the state of Alaska, the Consistency Determination under the Alaska Coastal Management Program, and the termination of administrative extensions as described in the Fact Sheet.

DATES: Interested persons may submit comments on the proposed reissuance of the general permit to EPA, Region 10 at the address below. Comments must be postmarked by August 17, 2009.

ADDRESSES: Comments on the proposed general permit reissuance should be sent to the attention of the Director, Office of Water & Watersheds, EPA—Region 10, 1200 Sixth Avenue Suite 900 OWW-130, Seattle, WA 98101. Comments may also be submitted electronically to godsey.cindi@epa.gov.
