SUPPLEMENTARY INFORMATION:

1. **Title:** Structure Inventory and Appraisal Sheet.

OMB Control Number: 2125-0501 (Expiration Date: July 31, 2004).

Abstract: The collection of the bridge information contained on the Structure Inventory and Appraisal Sheet (SI&A) is necessary to satisfy the requirements of Title 23 United States Code 144 and 151, and the Code of Federal Regulations, 23 Highways—Part 650, Subpart C—National Bridge Inspection Standards (NBIS) and Subpart D—Highway Bridge Replacement and Rehabilitation Program. The NBIS requires bridge inspection and reporting at regular intervals for all bridges located on public roads. The NBIS information is used as a basis for setting priorities for the replacement or rehabilitation of bridges under the Highway Bridge Replacement and Rehabilitation Program (HBRRP) and for apportioning HBRRP funds to the States for bridge replacement or rehabilitation. In addition, the information is used for strategic national defense needs and for preparing the report to Congress on the status of the Nation's highway bridges and funding under the HBRRP.

Respondents: 52 State Transportation Departments, including the District of Columbia and Puerto Rico.

Frequency: Biannual inspections and annual reporting.

Estimated Total Annual Burden: 540,000 hours. The average burden is two hours to complete each SI&A sheet on the approximate 300,000 bridges that are inspected annually. The total bridge inventory (rounded to 600,000) requires biannual inspections. Some States voluntarily inspect bridges more frequently; however, these estimates do not include this information.
