

experiences of persons at highest risk for HIV infection.

The Centers for Disease Control and Prevention requests a three-year approval for a revised information collection. Data will be collected through anonymous, in-person interviews conducted with persons systematically selected from up to 14 cities throughout the United States; these MSAs were chosen based on having high HIV prevalence. A brief screening interview will be used to determine eligibility for participation in the behavioral assessment. Participants will be recruited through respondent-driven sampling, a scientifically proven recruitment strategy for reaching hidden, hard-to-reach, or stigmatized populations. Interview data will be recorded on secure portable computers, without internet connections. Data will be transferred to secure, encrypted data servers. Data will be stored at CDC and shared with local health departments in accordance with existing data use

agreements and the Assurance of Confidentiality for HIV/AIDS Surveillance Data. Data will be disseminated in aggregate through academic and agency publications, presentations, and reports. All required data collection and activities will be anonymous.

Personally identifiable information (PII) is not included in the data collection. The CDC Privacy Officer has assessed this package for applicability of 5 U.S.C. 552a. The Privacy Act is not applicable because PII is not being collected under this CDC funded activity. The NHBS-Trans formative interview and optional HIV testing are anonymous (neither names nor Social Security numbers are collected). Data that will be collected through NHBS-Trans, while sensitive, are not personally identifying. The data from the behavioral assessment will provide estimates of (1) behavior related to the risk of HIV and other sexually transmitted diseases, (2) prior testing for

HIV, and (3) use of HIV prevention services. All persons interviewed will also be offered an HIV test and will participate in a pre-test counseling session. No other federal agency systematically collects this type of information from persons at risk for HIV infection. These data have substantial impact on prevention program development and monitoring at the local, state, and national levels.

The burden table below shows the estimated annualized burden hours for the participants' time. Annually, 1,540 participants will complete an eligibility screener (an average of 5 minutes to complete), 1,400 participants will complete the Behavioral Assessment (an average of 40 minutes to complete), and 1,400 will complete the Recruiter Debriefing Form (an average of two minutes to complete). The total estimated annualized burden is 1,110 hours. Participation of respondents is voluntary. There are no costs to respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Persons Screened	Eligibility Screener	1,540	1	5/60	129
Eligible Participants	NHBS-Trans Interview	1,400	1	40/60	934
Peer Recruiters	Recruiter Debriefing	1,400	1	2/60	47
Total	1,110
