Section 15(a)(1) of the FPA, 16 U.S.C. 808(a)(1), requires the Commission, at the expiration of a license term, to issue from year-to-year an annual license to the then licensee(s) under the terms and conditions of the prior license until a new license is issued, or the project is otherwise disposed of as provided in section 15 or any other applicable section of the FPA. If the project's prior license waived the applicability of section 15 of the FPA, then, based on section 9(b) of the Administrative Procedure Act, 5 U.S.C. 558(c), and as set forth at 18 CFR 16.21(a), if the licensee of such project has filed an application for a subsequent license, the licensee may continue to operate the project in accordance with the terms and conditions of the license after the minor or minor part license expires, until the Commission acts on its application. If the licensee of such a project has not filed an application for a subsequent license, then it may be required, pursuant to 18 CFR 16.21(b), to continue project operations until the Commission issues someone else a license for the project or otherwise orders disposition of the project.

Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. *Description of Request*: The licensee is requesting a temporary variance of the required minimum flow to the bypassed reach at the Upper Development Dam #1 under Article 40 of the project license, for the construction of a cofferdam to facilitate maintenance activities on the pelican gates. The variance would entail cessation of the required minimum flows to the bypass reach, of which approximately 1,100 feet would be dewatered from approximately July to early December 2025. This variance should allow adequate time for cofferdam construction, dewatering, and

inspection and repair of the gates. The licensee has obtained a joint permit from the U.S. Army Corps of Engineers and Idaho Department of Environmental Quality for the work and proposes to implement the Environmental Protection Agency's best management practices and follow the conditions of the joint permit to protect water quality and prevent erosion of project lands or sedimentation of project waters. Further, the licensee consulted with Idaho Fish and Game and would place gravel in the dewatered bypass reach for fisheries spawning restoration and enhancement and would survey the dewatered reach to capture and relocate any stranded fish in remaining pools.
