

Additionally, on April 20, 2022, the Council on Environmental Quality (CEQ) issued a final rule for implementing CEQ's NEPA regulations, including the definition of environmental "effects."²⁶ DOE has determined that, consistent with E.O. 14008 and its obligations under NEPA, it is appropriate to evaluate the potential environmental impacts—including the greenhouse gas emissions—of exporting (or re-exporting) U.S.-sourced LNG from the proposed MPL Facility to non-FTA countries. Therefore, on October 23, 2023, DOE issued a "Notice of Environmental Assessment" announcing that it is undertaking an environmental assessment (EA) under NEPA to analyze MPL's requested exports of U.S.-sourced LNG to non-FTA countries.²⁷

The Draft EA examined the potential environmental impacts associated with unconventional natural gas exploration and production activities in the lower-48 states; the utilization of the cross-border pipelines that interconnect the United States and Mexico and that MPL may utilize for its U.S. natural gas supply; descriptions of Mexico's environmental review process for the construction and operation of liquefaction terminals and related facilities; marine transport of LNG exported from the proposed MPL Facility; and the global nature of GHG emissions associated with re-exporting U.S.-sourced LNG from Mexico from a life cycle perspective.

NEPA Process and Public Involvement

DOE prepared the Draft EA in accordance with the CEQ regulations at Title 40, *Code of Federal Regulations*, parts 1500–1508 (40 CFR 1500–1508) and DOE's NEPA implementing procedures at 10 CFR part 1021. DOE published a Notice of Environmental Assessment to Docket No. 22–167–LNG on October 23, 2023, announcing its intent to prepare an EA. DOE is providing opportunities for public review and comments on this Draft EA
