SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov, or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Stationary Combustion Turbines were proposed on January 14, 2003; promulgated on March 5, 2004; and amended last on April 20, 2006. The regulations apply to sources that either commenced construction or reconstruction after January 14, 2003. On August 18, 2004, these standards were amended to stay the effectiveness for the two gas-fired stationary combustion turbine subcategories (*i.e.*, lean pre-mix gas-fired turbines and diffusion flame gas-fired turbines). Under this stay, new sources in either subcategory that are either constructed or reconstructed after January 14, 2003 are required to submit initial notification reports, but are also relieved of the obligation to comply with other reporting or monitoring requirements until EPA makes a final decision. Amendments to the NESHAP were proposed on April 12, 2019, as a result of a residual risk and technology review (RTR) required under the Clean Air Act (CAA); however, these amendments have not been finalized and no burden associated with the proposed amendments is included in this ICR. This information is being collected to assure compliance with 40 CFR part 63, subpart YYYYY.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities: Owners or operators of stationary combustion turbines.

Respondent's obligation to respond: Mandatory 40 CFR part 63.

Estimated number of respondents: 122 (total).

Frequency of response: Annual, semiannual.

Total estimated burden: 1,430 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$166,000 (per year), which includes \$0 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: The decrease in burden from the most recently-approved ICR is due to an adjustment. The number of respondents in this ICR is based on an inventory conducted as part of the Risk and Technology Review for this source category. The inventory reflects an increase in the number of facilities with gas-fired stationary combustion turbines and a decrease in the number of facilities with landfill or digester gas-fired and oil-fired stationary combustion turbines. The decrease in burden, capital, and operation and maintenance costs reflects industry trends towards gas-fired turbines. Turbines included in the two gas-fired subcategories that are either constructed or reconstructed after January 14, 2003 are required to submit initial notification reports, but are currently not required to comply with other reporting or monitoring requirements until EPA makes a final decision on the rule.

Courtney Kerwin,

Director, Regulatory Support Division.

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-RCRA-2016-0765, FRL-9994-99-OMS]

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; Solid Waste Disposal Facilities and Practices (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), Solid Waste Disposal Facilities and Practices (Renewal) (EPA ICR Number 1381.12, OMB Control Number 2050-

0122) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through August 31, 2019. Public comments were previously requested via the **Federal Register** on March 14, 2019 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before September 30, 2019.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-RCRA-2050-0122, to (1) EPA online using www.regulations.gov (our preferred method), by email to rcra-docket@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460, and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT:

Craig Dufficy, Materials Recovery and Waste Management Division, Office of Resource Conservation and Recovery, Mail Code 5304P, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: 703-308-9037; fax number: 703-308-0514; email address: dufficy.craig@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: In order to effectively implement and enforce final changes to 40 CFR part 258 on a State level, owners/operators of municipal solid waste landfills have to comply with the final reporting and recordkeeping requirements. Respondents include owners or operators of new municipal solid waste landfills (MSWLFs), existing MSWLFs, and lateral expansions of existing MSWLFs. The respondents, in complying with 40 CFR part 258, are required to record information in the facility operating record, pursuant to § 258.29, as it becomes available. The operating record must be supplied to the state as requested until the end of the post-closure care period of the MSWLF. The information collected will be used by the State Director to confirm owner or operator compliance with the regulations under Part 258. These owners or operators could include federal, state, and local governments, and private waste management companies. Facilities in NAICS codes 9221, 5622, 3252, 3251 and 3253 may be affected by this rule.

Form Numbers: None.

Respondents/affected entities: Recordkeeping and Reporting—Solid Waste Disposal Facilities and Practices.

Respondent's obligation to respond: The respondents, in complying with 40 CFR part 258, are required to record information in the facility operating record, pursuant to § 258.29, as it becomes available.

Estimated number of respondents: 10,211.

Frequency of response: On occasion.

Total estimated burden: 197,965 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$15,238,668 (per year), includes \$2,210,853 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This is due to the revised method of burden calculation, not any program changes or modifications to the underlying burden level assumptions. Previously, the burdens were grouped together and given a weighted average. On this ICR, each category of burdens was separated and evaluated as to the specific task. The task specific burden calculations are a reflection of actual hours spent on each task.

Courtney Kerwin,

Director, Regulatory Support Division.

Notification of Decision To Withdraw Proposed Determination To Restrict the Use of an Area as a Disposal Site; Pebble Deposit Area, Southwest Alaska

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The United States Environmental Protection Agency (EPA) Region 10 Regional Administrator is providing notice of the EPA's decision to withdraw the Proposed Determination to restrict the use of certain waters in the South Fork Kaktuli River, North Fork Kaktuli River, and Upper Talarik Creek watersheds in southwest Alaska as disposal sites for dredged or fill material associated with mining the Pebble deposit.

FOR FURTHER INFORMATION CONTACT: Visit www.epa.gov/bristolbay. Erik Peterson is the project manager. Please call a Bristol Bay-specific phone line at (206) 553-0040, or email r10bristolbay@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

EPA Region 10 is providing notice under 40 CFR 231.5(c) of EPA's withdrawal of the Proposed Determination to restrict the use of certain waters in the South Fork Kaktuli River, North Fork Kaktuli River, and Upper Talarik Creek watersheds in southwest Alaska as disposal sites for dredged or fill material associated with mining the Pebble deposit issued under EPA's Clean Water Act (CWA) Section 404(c) authority. EPA is concluding the process it started in July 2017, suspended in January 2018, and resumed in June 2019 to withdraw the Proposed Determination. EPA has decided that now is the appropriate time to complete the withdrawal of the Proposed Determination in light of developments in the record and the availability of processes for EPA to address record issues with the U.S. Army Corps of Engineers (Corps) prior to any potential future decision-making by EPA regarding this matter.

A. How to Obtain a Copy of the Proposed Determination: The July 2014 Proposed Determination is available via the internet on the EPA Region 10 Bristol Bay site at www.epa.gov/bristolbay.

B. How to Obtain a Copy of the Settlement Agreement: The May 11,

2017, settlement agreement is available via the internet on the EPA Region 10 Bristol Bay site at www.epa.gov/bristolbay.

C. How to Obtain a Copy of the Proposal to Withdraw the Proposed Determination: The July 2017 proposal to withdraw the Proposed Determination is available via the internet on the EPA Region 10 Bristol Bay site at www.epa.gov/bristolbay. Information regarding the proposal to withdraw can also be found in the docket for this effort at www.regulations.gov, see docket ID No. EPA-R10-OW-2017-0369 or use the following link: <https://www.regulations.gov/docket?D=EPA10-OW-2017-0369>.

D. How to Obtain a Copy of Notification of Suspension: The February 2018 notice announcing the EPA's decision to suspend the proceeding to withdraw the Proposed Determination at that time is available via the internet on the EPA Region 10 Bristol Bay site at www.epa.gov/bristolbay.

II. Factual Background

In 2011, EPA initiated an assessment to determine the significance of the Bristol Bay watershed's ecological resources and evaluate the potential impacts of large-scale mining on these resources. The stated purpose was to characterize the biological and mineral resources of the Bristol Bay watershed; increase understanding of the potential impacts of large-scale mining on the Region's fish resources; and inform future decision-making. Also in 2011, Northern Dynasty Minerals, which wholly owns the Pebble Limited Partnership (PLP), submitted information to the United States Securities and Exchange Commission that detailed its intention to develop a large-scale mine at the Pebble deposit. EPA Region 10 used this information to develop its mining scenarios for the Bristol Bay Watershed Assessment. After two rounds of public comments on drafts of the Bristol Bay Watershed Assessment in 2012 and 2013 that generated over one million comments, as well as independent external peer review, EPA Region 10 finalized the Assessment in January of 2014.

On July 21, 2014, EPA Region 10 published in the **Federal Register** (79 FR 42314) a Notice of Proposed Determination under section 404(c) of the CWA to restrict the use of certain waters in the South Fork Kaktuli River, North Fork Kaktuli River, and Upper Talarik Creek watersheds (located within the larger Bristol Bay watershed) as disposal sites for dredged or fill
