Information Collection Requirement

OMB Control Number 1652–0033; TSA Airspace Waiver Program. TSA is seeking approval to extend this collection of information. The airspace waiver program allows U.S. and foreign general aviation aircraft operators to apply for approval to operate in U.S. restricted airspace, including flying over the United States and its territories. This program includes both processing of applications for airspace waivers and flight authorizations for flights operating under the Ronald Reagan Washington National Airport Access Standard Security Program (*see* subpart B of 49 CFR part 1562), which requires name-based STAs for all passengers, flight crews and armed security officers operating manned aircraft and UAS.

TSA uses the information to conduct STAs of persons on these flights to protect against and mitigate threats to transportation or national security.

TSA collects information from applicants applying for a waiver or flight authorization either online via <https://waivers.faa.gov>, or by completing a waiver or flight authorization form, which can be requested via facsimile. To ensure adequate time to process the information and obtain approval, TSA recommends that applicants submit the request electronically within, at a minimum, five business days before the start-date of the flight.

The type of information collected depends upon the purpose of the application; however, both waiver and flight authorization requests must include the purpose of the flight, the aircraft type and registration number, including aircraft operator's company name and address, and the proposed itinerary. To enable TSA to conduct STAs, the aircraft operator must provide the name, sex, date and place of birth, and Social Security or passport number for each individual onboard manned aircraft, including all pilots, passengers, crew and armed security officers, and on individuals who conduct UAS flight operations.

The estimated number of respondents is 9,687, and the annual reporting burden is 7,173 hours.
