(A) The maximum number of acres certified for APH purposes, or insured acres reported, for the crop in any one of the 4 most recent crop years (not including reported prevented planting acreage that was planted to a second crop unless you meet the double cropping requirements in section 17(f)(4)). The number of acres determined above for a crop may be increased by multiplying it by the ratio of the total cropland acres that you are farming this year (if greater) to the total cropland acres that you farmed in the previous year, provided that you submit proof to us that for the current crop year you have purchased or leased additional land or that acreage will be released from any USDA program which prohibits harvest of a crop. Such acreage must have been purchased, leased, or released from the USDA program, in time to plant it for the current crop year using good farming practices. No cause of loss that would prevent planting may be evident at the time you lease the acreage (except acreage you leased the previous year and continue to lease in the current crop year); you buy the acreage; the acreage is released from a USDA program which prohibits harvest of a crop; you request a written agreement to insure the acreage; or you otherwise acquire the acreage (such as inherited or gifted acreage).
