*Instructions:* All submissions received must include the words "Department of Homeland Security" and the docket number for this action. Comments received will be posted without alteration at *http://www.regulations.gov*, including any personal information provided.

**SUPPLEMENTARY INFORMATION:**

The Homeland Security Act of 2002 assigns DHS the responsibility to lead the national effort to identify, prioritize, and assess the nature and scope of threats to the United States and develop a comprehensive national plan for securing the Nation's critical infrastructure and key resources (CIKR). At DHS, this responsibility is managed by IP within NPPD. In Fiscal Year 2006, IP engaged in the annual development of a list of CIKR assets and systems to improve IP's CIKR prioritization efforts; this list is called the Critical Infrastructure List. The Critical Infrastructure List includes assets and systems that, if destroyed, damaged or otherwise compromised, could result in significant consequences on a regional or national scale.

The IP Data Call is administered out of the IP Infrastructure Information Collection Division (IICD). The IP Data Call provides opportunities for states and territories to collaborate with DHS and its Federal partners in CIKR protection. DHS, state, and territorial Homeland Security Advisors (HSA), Sector Specific Agencies (SSA), and territories build their CIKR data using

the IP Data Call application. To ensure that HSAs, SSAs, and territories are able to achieve this mission, IP requests opinions and information in a survey from IP Data Call participants regarding the IP Data Call process and the web-based application used to collect the CIKR data. The survey data collected is for internal IP/IICD use only.

IP/IICD will use the results of the IP Data Call Survey to determine levels of customer satisfaction with the IP Data Call process and the IP Data Call application and prioritize future improvements. The results will also allow IP to appropriate funds cost effectively based on user need, and improve the process and application.

OMB is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
