

and understates supply of natural gas liquids and refinery olefin products.

#### **Form EIA-815 Monthly Bulk Terminal Report**

- Change the label for product code 207 from the current “Other renewable fuels and intermediate products” to “Other Biofuels and Biointermediates” not elsewhere specified or indicated. This change is to make the Form EIA-815 product label consistent with terminology used in EIA, other government agencies, and the biofuel industry.

- Add a product line for bulk terminal operators to report stocks of propane that meet at least the minimum specifications to be classified as consumer-grade propane (product code 626). The added product detail for consumer-grade propane will add transparency to propane supplies by showing separate stock levels of consumer-grade propane readily available for consumption and propane held as a component of product mixes where the propane requires processing through a fractionator or other unit before being consumed as propane. At present, EIA stock levels for propane do not differentiate between consumer-grade and higher grades of propane that are ready for use and propane contained as a component of a product mix.

#### **Form EIA-816 Monthly Natural Gas Liquids Report**

Add a separate product line for operators of natural gas processing plants to report plant condensate (product code 210) as a product separate from natural gasoline (product code 220). Plant condensate and natural gasoline are separate products of natural gas processing plants with different uses, but the current Form EIA-816 combines the two products under the natural gasoline label. Natural gasoline is normally used either for blending into gasoline, as petrochemical feedstock, or exported. Plant condensate is usually either blended into crude oil or exported. Reporting plant condensate as a product separate from natural gasoline will provide greater transparency to supplies of both NGL and crude oil. This change will also make reporting on Form EIA-816 consistent, in terms of the products reported, with Form EIA-64A *Annual Report of the Origin of Natural Gas Liquids*.

#### **Form EIA-817 Monthly Tanker and Barge Movements Report**

Change the label for product code 207 from the current “Other renewable fuels and intermediate products” to “Other Biofuels and Biointermediates” not

elsewhere specified or indicated. This change is to make the Form EIA-817 product label consistent with terminology used in EIA, other government agencies, and the biofuel industry.

#### **Form EIA-819 Monthly Report of Biofuels, Fuel Oxygenates, Isooctane, and Isooctene**

- Change the label for product code 183 in part 8 of Form EIA-819 from the current “Other renewable fuels and intermediate products” to “Other Biofuels and Biointermediates” not elsewhere specified or indicated. This change is to make the Form EIA-819 product label consistent with terminology used in EIA, other government agencies, and the biofuel industry.
